

Introduction to SWIFTNet 7.0

*SWIFT Training
Our knowledge,
your solution.*

You will learn how to

- Prepare for SWIFTNet and Alliance release 7.0
- Exploit all new functionalities in your infrastructure

SWIFTNet 7.0 is a major and mandatory SWIFTNet release that will be launched at the end of 2010. It allows you to benefit from new business features, provides various functional enhancements, and introduces changes that will simplify and ease operations. In the area of security administration, it brings new options that provide additional flexibility and ease specific time-consuming tasks.

This half-day session provides you with a general overview of the most important updates, which will allow you to prepare for the release, set up a project team and start planning in time.

Audience

This session is targeted at back-office staff, systems engineers and system administrators who are preparing for the SWIFTNet/Alliance 7.0 migration.

Duration

Classroom course: 1/2 day
Web class: 3 hours
On-site training: as per your requirements

Prior knowledge

We recommend that you first have attended the courses 'Understanding SWIFTNet services and security', 'Managing Alliance Access' and 'Managing Alliance Gateway'.
