

Managing Alliance Entry

*SWIFT Training
Our knowledge,
your solution.*

You will learn how to

- Set-up and run the Alliance Entry interface
- Manage your interface efficiently by going through the general house-keeping requirements
- Connect to external or back-office applications
- Use your Alliance interface by listening to the instructor and by doing practical exercises

If you are responsible for configuring and maintaining your Alliance Entry system, then this hands-on course will help you get the most out of your interface.

Audience

Back-office managers, IT staff and managers and interface administrators.

Duration

Classroom course: 2 days
On-site training: as per your requirements

Prior knowledge

We recommend that you first attend the course 'Operating Alliance Access'.

Course content

- Installation of patches, message syntax tables and BIC files
- System management and system administration applications
- Archive and backup procedures
- Advanced searches in the message file and event journal
- Security definition application: profiles, users and passwords
- Message partners and routing: connectivity of Alliance Entry with external applications and printers
- Monitoring the system for general status inquiries
- Overview of the SWIFTNet configuration
