

Managing Alliance Gateway

*SWIFT Training
Our knowledge,
your solution.*

You will learn how to

- Manage and configure your Alliance Gateway via hands-on exercises, under the guidance of an experienced trainer
- Connect Alliance Gateway to your back office systems

Do you know how to configure and manage Alliance Gateway in your infrastructure? After having attended this comprehensive course, you should be well prepared and able to deploy Alliance Gateway successfully.

Audience

Alliance Gateway administrators, security officers, IT staff and managers, interface administrators and back-office managers.

Duration

Classroom course: 2 days
On-site training: as per your requirements

Prior knowledge

It is recommended to have a prior knowledge of the SWIFT services, security and network. If you are new to SWIFTNet, this knowledge can be acquired through the one-day classroom course or SWIFT eTraining package 'Understanding SWIFTNet services and security'.

Course content

Several demos and exercises presenting the Alliance Gateway system administration will guide you through the following topics:

- Alliance Gateway overview
 - Licence options
 - Alliance WebStation versus Alliance Web Platform
- Full system administration including user management, process control and monitoring
- PKI and security management
- Connectivity with your back-office applications
- Manual and automatic file transfer
- Using a Browse service
