

Understanding SWIFTNet services and security

*SWIFT Training
Our knowledge,
your solution.*

You will learn how to

- Identify the different messaging services, products and security
- Prepare for SWIFT-related projects and discussions in your institution
- Prepare for more specific SWIFT-related technical courses

Are you new to SWIFTNet? This course brings you up to speed on SWIFT's Secure IP Network, SWIFTNet messaging services, the range of SWIFT interfaces, and security in just one day. By attending this course, you will be able to build a decent foundation before attending more advanced courses related to connectivity, interfaces and security.

Audience

- Anyone requiring a good understanding of SWIFTNet services, products, security and features
- Anyone who needs fundamental SWIFTNet knowledge that is required

Duration

Classroom course: 1 day
SWIFT eTraining: 3 hours
On-site training: as per your requirements

Prior knowledge

This is an intermediate-level technical course, requiring an understanding of IT fundamentals.

Course content

- Introduction: SWIFTNet at a glance
- The Secure IP Network, including resilient network access options
- The core messaging services and their features: InterAct, FileAct and Browse
- SWIFTNet interfaces: SWIFTNet Link, Alliance Gateway, Alliance Web Platform, Alliance WebStation, Alliance Messenger
- SWIFT's MX standards
- SWIFTNet security: layered security, PKI and SWIFTNet security officers
