

## Watch - analysing your business data

*SWIFT Training  
Our knowledge,  
your solution.*

### You will learn

- About the basic functionalities of the Watch Analysers
- How to use the specific Analysers you subscribe to
- How to analyse your own data and drill down on examples you find interesting

Do you want to analyse how many messages you are sending? Receiving? Which message types? FIN, InterAct or FileAct? The average price of your messages? Your market share? How your traffic is evolving? Who are your main counterparties? What is the value of your transfers? What is your total cost of ownership of SWIFT? Or do you want to access key data about SWIFT across markets and countries?

This comprehensive training gives you direct and easy access to business intelligence about your own institution as well as the overall market through either a private webclass or hands-on training on your premises.

### Audience

This course is targeted at staff responsible for analysing the SWIFT business data of your company and those who are registered Watch end users. (If another person would like to attend as well, he or she should first register as a new end user or provide a justification.)

### Duration

Private web class: 3.5 hours  
On-site training: up to 1 day, as per your requirements

### Prior knowledge

It is recommended to have prior knowledge about your SWIFT business.

### Course content

- Watch portfolio overview
- Watch Analysers - dimensions and measures
- How to build results tables (drag & drop, filters, drilling down, expanding, nesting, etc.)
- How to work with data (sorting, hiding, ranking, subsets, charts, etc.)
- Extra (exporting, bookmarking, reports, etc.)
- Practical case scenarios from your own data in the Analysers & Reports that you subscribe to (Traffic Analyser, Message Cost Analyser, Market Analyser, Billing Analyser, Value Analyser, Reports)
