

Your SWIFT guide to the securities markets

*SWIFT Training
Our knowledge,
your solution.*

You will learn

- ▶ About the basic principles of the securities market
- ▶ How SWIFT facilitates standardised communications and processing at all levels of the lifecycle of the transaction – from trade initiation to settlement and corporate actions

This course provides you with the basic principles of the securities markets. It will help you to understand the different instruments such as bonds and equities, who the market players are and how they interact, what settlement is and the basics of corporate actions. This course can also be used to build a good foundation for the more specialised training sessions on SWIFT's products and services for the securities markets.

Audience

The course targets anyone who needs a basic understanding of the securities markets and SWIFT securities messages, typically newly hired staff in institutions such as custodians, securities market infrastructures, investment/asset managers, data providers and broker/dealers.

Duration

Classroom course: 1 day
SWIFT eTraining: 3 hours
On-site training: as per your requirements

Prior knowledge

No prior knowledge is required. However, if you are new to SWIFT, we recommend you to first follow the SWIFT eTraining package or classroom course 'Basics - your passport to SWIFT'.

Course content

- Introduction to the securities markets
- What can SWIFT do for you?
- How can you use SWIFT for securities?
- Paving the way for STP – securities standards
- Market initiatives and market reform

The course will illustrate some messages from the trading, settlement and corporate actions area.
