

ABC's of SWIFT

A three day on-site training package

*SWIFT Training
Our knowledge,
your solution.*

Benefits

- Obtain the necessary knowledge to get you up and running on SWIFT in three days
- Training on your premises: no travel expenses for your staff
- Spread the necessary awareness of SWIFT at different levels in your institution
- Our experienced trainers guarantee you receive the latest and most accurate information on SWIFT
- Put your investment in SWIFT to work with SWIFT Training

Welcome to the world of SWIFT. You are scheduled to cutover later this year. SWIFT Training can help you achieve this important goal. We are offering a three-day on-site training package called 'ABC's of SWIFT'. The training session allows you to understand the basics of SWIFT: correct usage of payment message standards, the SWIFT system and Alliance.

This three day course consists of four modules. According to the module, people of different divisions in your institution may attend.

Module 1 - Overview of SWIFT (0.5 day)

Get to know the fundamentals of SWIFT in a half day: the community, the messaging services on SWIFTNet, the new SWIFT's business solutions, etc.

This module is aimed at all staff in your institution: sales, product managers, finance staff, operations, audit, compliance, IT staff, system administrators, developers, support.

Module 2 - SWIFT payment messages (0.5 day)

An introduction to the most commonly used customer and bank payment messages MT 103 and MT 202. The instructor will teach you how to create and interpret the different messages.

This module is beneficial for operators, product managers, audit, compliance and application developers.

Module 3 - Introduction to FIN (1 day)

Understand the operational aspects of SWIFT. Learn how to perform day-to-day tasks to manage your SWIFT system and get the necessary background to successfully exchange bilateral keys.

This module is specifically targeted at your interface administrators, operators, security officers and auditors.

Module 4 - Operating Alliance (1 day)

Learn the basic commands to operate your Alliance interface.

This module is designed for operators, system supervisors, audit and compliance..

The cost of this three-day introductory program is only EUR 7500, plus travel and expense costs of the instructor to your location.

If this program does not meet your requirements, we can prepare a tailor-made on-site course for you. You can also check the SWIFT Training website for a complete overview of our open classroom courses.
