Note: A Message User Group (MUG), for the purposes of this book, is a group of users who have voluntarily agreed to support the specified message type and have registered with SWIFT to send or receive the specified message type. These messages are indicated in the preceding table in the column MUG.

Registration is free of charge. To register to use one or more message types, submit a registration request (**Order Message User Group**) through the forms available on www.swift.com > Ordering & Support > Ordering > Order Products and Services > Message User Group (MUG).

To withdraw from a MUG, use the **Terminate your MUG subscription** request. These forms are available at www.swift.com > Ordering & Support > Ordering > Terminate and deactivate > Message User Group (MUG).

MT 101 Request for Transfer

Note: The use of this message type requires Message User Group (MUG) registration.

MT 101 Scope

This message is:

- sent by a financial institution on behalf of a non-financial institution account owner, to an account servicing financial institution or to a forwarding financial institution for further transmission to the account servicing institution.
- sent by a non-financial institution account owner, or a party authorised by the account owner, to an account servicing financial institution or to a forwarding financial institution for further transmission to the account servicing institution.

It is used to move funds from the ordering customer's account(s) serviced at the receiving financial institution or at the account servicing institution, or from an account(s) owned by the ordering customer which the instructing customer has explicit authority to debit, for example, a subsidiary account.

The MT 101 can be used to order the movement of funds:

- between ordering customer accounts, or
- in favour of a third party, either domestically or internationally.

For use of messages in the corporate to bank environment, see the MT message implementation guide for corporate customers available on www.swift.com.

MT 101 Format Specifications

The MT 101 consists of two sequences:

- Sequence A General Information is a single occurrence mandatory sequence and contains information to be applied to all individual transactions detailed in sequence B.
- Sequence B Transaction Details is a repetitive sequence; each occurrence provides details of one individual transaction. Fields which appear in both sequences are mutually exclusive.

Consequently, field 50a (option F, G or H), must be present in either sequence A (index 5) or in each occurrence of sequence B (index 15), but must never be present in both sequences, nor be absent from both sequences (Error code(s): D61).

Present	Not allowed
Not present	Optional

- C7** If field 56a is present, field 57a must also be present (Error code(s): D65).

If field 56a is ...	Then field 57a is ...

Not present	Optional

- C8** If field 21R is present in sequence A, then in each occurrence of sequence B, the currency code in fields 32B must be the same (Error code(s): D98).

- C9** In each occurrence of sequence B, the presence of fields 33B and 21F is dependent on the presence and value of fields 32B and 23E as follows (Error code(s): E54).

MT 101 Usage Rules

- If field 21R is present in sequence A, and field 28D indicates that more than one message is chained for this request for transfer instruction, the currency code must be the same for all occurrences of field 32B in sequence B of all chained messages.
- In case of an equivalent amount transfer, identified with the code EQUI in field 23E, the transaction amount in field 32B must equal zero.

- In case of sweeping, topping or zero balancing operations, identified with a code in field 23E, the transaction amount in field 32B can equal zero.
- In case field 28D indicates that messages are chained, all messages belonging to the same chain must have exactly the same sender's reference in field 20.
- In case field 28D indicates that messages are chained, sequence A must be repeated and be identical for all messages belonging to the same chain.
- When the currency of the settlement amount is in euro and it is necessary to indicate the equivalent in National Currency Denomination, the following guideline applies:
 - field 32B contains the euro amount, to be executed by the receiver;
 - field 33B contains the currency and value of the instructed amount that is the NCD amount, equivalent to field 32B;
 - field 36 (due to network validated rule 2) contains the fixed conversion rate between the euro and the National Denomination Currency amounts;
 - field 21F (due to network validated rule 1) contains the value "NONREF".

The complete chain of parties and the transaction flow is illustrated by the following figure:

The parties mentioned in the chain are not necessarily different entities. The first column of the table below shows the parties that can be omitted in an MT 101. The second column specifies the party which assumes the role of the party in the first column, when it is not present:

If the following party is missing ...	Its function is assumed by ...
Instructing party	Ordering customer
Account servicing institution	Receiver
Intermediary	Account with institution
Account with institution	Receiver

MT 101 Mapping

The following illustrates the mapping of a single-transaction MT 101 onto an equivalent MT 103:

National and Banking practices may differ from the mapping shown above.

Mapping onto an MT 103 core is shown for illustration purposes. A multiple MT 101 could also be mapped onto an MT 102 or onto several MTs 103. Mapping onto an MT 103 STP may require more constraints.

Note:

- Fields 20, 21R, 28D, 51A, 25, 21F and 25A should not be mapped onto the MT 103.
- See **(a)** in the figure above.
If both field 50a Instructing Party (50C or L) and field 50a Ordering Customer (50F, G or H) are present in the MT 101 then, per default, 50a Ordering Customer should be mapped onto the subsequent MT 103.
- See **(b)** in the figure above.
Field 30 of the MT 101 is used to construct subfield 1 of field 32A of the MT 103. Whenever relevant, the Interbank Settlement Date of the MT 103 takes into account the instruction codes present in field 23E of the MT 101 (for example RTGS).
- See **(c)** in the figure above.
As a general rule, field 23E of the MT 101 is mapped to field 23E of the MT 103. However codes CMSW, CMTO, CMZB, NETS and URGP are intended for the receiver of the message and no mapping to the MT 103 is required, except in the case of codes CMSW, CMTO and CMZB where the beneficiary account is not with the receiver of the MT 101. In this case these codes must be mapped to field 70 of the MT 103. Code EQUI is not mapped to a field of the MT 103, but its presence in the MT 101 will result in the presence of fields 32A, 33B and 36 in the MT 103.

Note:

Some codes require specific mapping action at the executing institution, for example:

- RTGS mapped from the MT 101 to the MT 103 may require the payment to be executed via an RTGS system or code //RT to be added in field 57a of the MT 103

- CHQB in the MT 101 will lead to the issuance of a cheque by the executing institution when fields 56a and 57a are not present or by specified correspondent when fields 56a and/or 57a are present
- PHON in the MT 101 should be mapped to PHOB in the MT 103
- See **(d)** in the figure above.
When present, field 33B of the MT 101 is mapped onto field 33B of the MT 103. If field 33B is not present in the MT 101, field 32B of the MT 101 is mapped onto field 33B of the MT 103. In all other cases, field 32B of the MT 101 is used to build subfields 2 and 3 of field 32A of the MT 103.
- Note:**
Charges for the processing of the MT 101 are to be accounted for separately and posted to the account mentioned in field 25A of the MT 101, when present. Below charges relate to the processing of the MT 103 only.
 - If field 71A of the MT 101 contains SHA, field 32B of the MT 101 is mapped to subfields 2 and 3 of field 32A of the MT 103.
 - If field 71A of the MT 101 contains OUR and charges are known, charges for the entire transaction are added to field 32B of the MT 101 and mapped in field 32A of the MT 103. In this case, field 71G of the MT 103 may be present.
 - If field 71A of the MT 101 contains OUR and charges are not known, field 32B of the MT 101 is mapped onto field 32A of the MT 103 and field 71G is not present (in this case, the executing institution will be charged back by the next party(ies) in the transaction chain).
 - If field 71A contains BEN, charges of the executing bank are deducted from field 32B from the received MT 101. The result is mapped onto field 32A of the MT 103. In this case, charges of the executing bank will be quoted into field 71F of the MT 103.
- See **(e)** in the figure above.
Fields 56a and 57a:
 - If both fields 56a and 57a are not present in the MT 101, the MT 101 triggers a book transfer at the executing institution or issuance of a cheque.
 - If both fields 56a and 57a are present, field 56a maps to the Receiver of the MT 103 and field 57a is mapped in field 57a of the MT 103.
 - If only field 57a is present in the MT 101, field 57a is mapped onto Receiver of the MT 103.
- See **(f)** in the figure above.
It is not mandatory to map field 21 of the MT 101 in the MT 103. However, if desired, it should be mapped onto field 70 of the MT 103 as follows: :70:/ROC/value.

MT 101 Operating Procedures

This message requires the implementation of special procedures, with its use governed by at least the following two bilateral agreements:

- Between the account servicing financial institution and the ordering customer.
- Between the sending financial institution and the ordering customer.

Depending on local market practice, additional bilateral agreements may be required, for example:

- Between the sending financial institution and the receiving financial institution.
- Between the account servicing financial institution and the instructing party.

Institutions are recommended to use the MT 101 Operational Rules and Checklist as a guide for establishing their agreements. These bilateral agreements cover the responsibilities/liabilities of the parties of the request for transfer, the transaction amount limits, etc.

MT 101 Operational Rules & Checklist

This section provides a checklist for MT 101 payments. It is strongly recommended that these guidelines be used by financial institutions as a basis for establishing bilateral or multilateral agreements for the processing of request for transfer payments, that is payments transmitted by MT 101 via FIN, or FileAct.

It is also recommended that all items listed be covered in the bilateral or multilateral agreements. In order to further facilitate the set up of these agreements, common procedures have been defined which financial institutions, if they wish, may override.

The checklist is not intended to provide an exhaustive list of items, nor does SWIFT claim any responsibility for it.

Bilateral Agreements, General Overview

Bilateral Agreement 1

Amends an existing agreement between the receiving financial institution and the ordering customer.

This agreement establishes the receiving financial institution's authorisation to accept and act upon ordering customer requested payment instructions received from the sending financial institution. Responsibility of effecting the actual movement of funds is an obligation of the receiving financial institution.

Bilateral Agreement 2

Amends an existing (electronic payments link) agreement between the sending financial institution and the ordering customer.

This agreement must clarify the obligations of the sending financial institution, including ensuring the integrity of the message received from the ordering customer, and the monitoring of the delivery of the message to the receiving financial institution.

The agreement should also state that the liability of the sending financial institution is limited to the delivery of this message to the SWIFT network in a timely manner. In other words the sending financial institution is not liable for the actual payment.

Bilateral Agreement 3

Establishes a bilateral agreement between financial institutions exchanging request for transfer messages.

This agreement, if necessary, should further clarify the inter-bank responsibilities of the financial institutions involved in the request for transfer payment flow.

Bilateral Agreement 4

Establishes a bilateral agreement between the account servicing financial institution and the instructing party/ordering customer.

This agreement, when used, allows the account owner to authorise the account servicing financial institution to effect the transfers ordered by the ordering customer or instructing party.

Transaction Amount Limits

When financial institutions agree to define amount limits on the individual transactions, their limits should be specified per currency.

When the agreement allows for transactions above amounts to which specific requirements apply, for example regulatory reporting requirements, these requirements and their associated formatting should also be specified in the agreement.

Charging Options and Amounts

There are three charging options as defined for use in the MT 101, that is OUR, SHA, BEN.

These charges can be an exact amount or formula (percentage). The charges cover the guarantee and processing of transactions which the Receiver provides to the Sender, up to the transactions posting to the Beneficiary's account, or execution of payment to the beneficiary's account with institution. The pricing of incidental bank-customer services, for example the method of advice for daily/weekly/monthly statements, and their subsequent charging, which may differ from institution to institution, are not considered to be part of the charges.

Charges due to	Charges per message ⁽¹⁾	Charges per transaction ⁽¹⁾

(1) formula or exact amount

Dates & Time Frames

The sending financial institution and the receiving financial institution should agree on the time frame needed by the Receiver to execute the payments accepted in its country. This time frame starts as of an agreed upon cut-off time for receipt of incoming messages by the Receiver.

Messages received before the Receiver's cut-off time, will be settled on a pre-agreed upon day which is X number of days following the day of receipt D. For messages received after the Receiver's cut-off time, the settlement time frame will be based on D+1.

D will also be the basis for calculating the requested execution date, that is the date on which the ordering customer account is to be debited.

	Currency 1	Currency 2
Receiver's cut-off time		
Settlement time frame	D (+)	D (+)
Execution time frame for on/us payments (until funds are on account of Beneficiary)	D (+)	D (+)

	Currency 1	Currency 2
Execution time frame for not on/ us payments (until funds are on the account of Beneficiary)	D (+)	D (+)

Explanation

D = Date of acceptance and receipt, meaning the message is received by Receiver before their cut-off time;

-or-

D = Date of receipt, and, D + 1 = date of acceptance, meaning the message was received after the Receiver's cut-off time on D.

Level of Controls/Checks and Acceptance of Messages/Transactions

Unless otherwise agreed, financial institutions will take as a basis for their controls/checks all current security aspects of FIN or FileAct as well as the MT 101 message syntax and semantics as defined in the MT 101 message specifications.

In order to achieve straight-through processing of the MT 101s exchanged, financial institutions should define checks and controls related to the bilaterally agreed items.

Unless otherwise agreed/required, transactions passing the checks and controls are considered accepted and therefore irrevocable, that is to be posted to the ordering customer account at the Receiver. In FileAct, the positive acknowledgement sent by the Receiver confirms acceptance of the message received. In FIN, no specific message is required.

If transactions do not pass the checks/controls, they will be rejected (see section 5 below).

Checks and controls performed by the Receiver, including error codes prior to the execution of the transactions:

Checks/Controls	Yes/No	Error code
Transaction amount		
Requested execution date		
Validity of sending financial institution		
Account number/validity of ordering customer		
Currency present		
Account number/identification of beneficiary		
Remittance data (Length/Code)		
Instructing code		
Account balance		
Credit limit		

Checks/Controls	Yes/No	Error code
Other		

Rejects/Returns of Messages/Transactions

For rejects due to a communication failure between the Sender and the Receiver, the existing FIN and FileAct rules apply.

Unless otherwise agreed, messages properly received but failing to pass the checks as defined in section 4 (see above) will be rejected by the Receiver without further processing.

When advising of the transaction/message rejection in FIN, financial institutions are recommended to use either the MT 195, or another message type which follow the SWIFT payment reject guidelines. In FileAct, financial institutions are recommended to use the negative acknowledgement to advise of the rejection.

The reject advice should contain, at a minimum, the reference of the rejected transaction/message and the corresponding error code(s). The parties should bilaterally agree the maximum delay acceptable for the Receiver to notify the sending financial institution, as well as possible related charges.

Unless otherwise agreed, the notification that is returned to the Sender exempts the Receiver from processing the message. The sending financial institution will, after correction, resubmit the transaction/message.

The return of a rejected transaction/message to the sending financial institution after the transaction/message has been posted to an account of the ordering customer at the Receiver, will cause a settlement. Unless otherwise agreed, this settlement will adhere to the following rules:

- it should be in the same currency as the original transaction currency
- it should take place at a bilaterally agreed value date
- the original ordered transaction amount should remain unchanged
- the settlement should take place via the same account relationship(s)
- normal banking practice prevails.

All subscribers should agree on a maximum number of working days after receipt of the MT 101 for rejecting/returning a transaction/message, and on the associated charges to be applied.

The following chart provides details regarding the transaction/message reject/return:

	Reject	Return
Maximum delay from moment of receipt to advice of the reject/return to Sender		
Charges due to the reject/return		

A **Reject** occurs when the message and/or transaction has not yet been booked, that is, accounting has not yet taken place.

A **Return** occurs when the message and/or transaction has already been booked, that is, accounting has already taken place.

Cancellations

Unless otherwise agreed or required by law, messages properly received and accepted are to be considered as irrevocable. Cancellation therefore should be the exception.

If, however, cancellations are accepted in the bilateral agreement, the following details should be agreed upon:

	Details
Acceptable delay for the ordering customer to request cancellation of message	
Acceptable delay for acceptance and response by the Receiver to such a request	
Charges due to the Receiver as a result of such a request	

It is recommended that request for cancellations be sent by MT 192 and responded to by MT 196.

MT 102 Multiple Customer Credit Transfer

Note: The use of this message type requires Message User Group (MUG) registration.

MT 102 Scope

This message is sent by or on behalf of the financial institution of the ordering customer(s) to another financial institution for payment to the beneficiary customer.

It requests the Receiver to credit the beneficiary customer(s) directly or indirectly through a clearing mechanism or another financial institution, or to issue a cheque to the beneficiary.

This message is used to convey multiple payment instructions between financial institutions for clean payments. Its use is subject to bilateral/multilateral agreements between Sender and Receiver.

Amongst other things, these bilateral agreements cover the transaction amount limits, the currencies accepted and their settlement. The multiple payments checklist included below is recommended as a guide for institutions in the setup of their agreements.

MT 102 Format Specifications

The MT 102 consists of three sequences:

- Sequence A General Information is a single occurrence sequence and contains information which applies to all individual transactions described in sequence B.
- Sequence B Transaction Details is a repetitive sequence. Each occurrence is used to provide details of one individual transaction.
- Sequence C Settlement Details is a single occurrence sequence and contains information about the settlement.

MT 102 Usage Rules

- If a registered user receives an MT 102 without bilateral agreement with the Sender, the Receiver should query the message according to normal banking practice.
- When sending the MT 102 via FileAct, institutions must use the payment-related profile.

Usage Rules for Amount Related Fields

There is a relationship between the amount related fields 33B, 32B, 36, 71G, 71F, 19 and 32A which may be logically expressed in the following formulas:

- For each occurrence of sequence B, the instructed amount in field 33B, adjusted with the exchange rate in field 36, minus the Sender's charges in field(s) 71F, equals the transaction amount in field 32B.

- The sum of all transaction amounts in fields 32B, equals the total amount in field 19.
- The sum of all Receiver's charges in fields 71G of sequence B, equals the total Receiver's charges of field 71G in sequence C.
- The total amount in field 19 (or the sum of all transaction amounts in fields 32B), plus the total Receiver's charges in field 71G of sequence C, equals the interbank settled amount in field 32A.

Presence of the fields mentioned above is subject to the conditional field rules C5, C6, C8, C9, C10 and C11. If a field is not present, that field must not be taken into account in the formula. If field 71F is present more than once, all occurrences of that field must be taken into account in the formula.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Option A is the preferred option.

Option C must be used where only an account number is to be specified.

In those cases where there are multiple direct account relationships, in the currency of the transaction, between the Sender and the Receiver, and one of these accounts is to be used for reimbursement, the account to be credited or debited must be indicated in field 53a.

If there is no direct account relationship, in the currency of the transaction, between the Sender and the Receiver (or branch of the Receiver when specified in field 54A), then field 53a must be present.

When field 53a is present and contains a branch of the Sender, the need for a cover message is dependent on the currency of the transaction, the relationship between the Sender and the Receiver and the contents of field 54A, if present.

A branch of the Receiver may appear in field 53a if the financial institution providing reimbursement is both the Sender's correspondent and a branch of the Receiver, and the Sender intends to send a cover message to the branch of the Receiver. In this case, the Receiver will be paid by its branch in field 53a.

In all other cases, when field 53a is present, a cover message, that is, MT 202/203 or equivalent non-SWIFT must be sent to the financial institution identified in field 53a.

The use and interpretation of fields 53a and 54A is, in all cases, dictated by the currency of the transaction and the correspondent relationship between the Sender and the Receiver relative to that currency.

Optional in mandatory sequence C

DEFINITION

Where required, this field specifies the branch of the Receiver or another financial institution at which the funds will be made available to the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

The absence of fields 53a and 54A implies that the single direct account relationship between the Sender and the Receiver, in the currency of the transfer, will be used.

In those cases where field 54A contains a branch of the Receiver, and is not preceded by field 53a, or field 53a contains an account of the Sender serviced by the Receiver's branch, the Receiver will claim reimbursement from its branch.

If field 54A contains a branch of the Receiver and field 53a contains a branch of the Sender, the Receiver will claim reimbursement from its branch or will be paid by its branch, depending on the currency of the transfer and the relationship between the Sender and the Receiver.

In all other cases where field 54A contains a branch of the Receiver, the Receiver will be paid by its branch in field 54A.

A branch of the Sender must not appear in field 54A.

If the branch of the Sender or other financial institution specified in field 53a is also the account servicer for the Receiver, field 54A must not be present.

Field 54A containing the name of a financial institution other than the Receiver's branch must be preceded by field 53a; the Receiver will be paid by the financial institution in field 54A.

The use and interpretation of fields 53a and 54A is in all cases dictated by the currency of the transaction and the correspondent relationship between the Sender and Receiver relative to that currency.

PRESENCE

Optional in mandatory sequence C

DEFINITION

This field specifies additional information for the Receiver.

NETWORK VALIDATED RULES

If the first six characters in line 1 contain the character string /REJT/ or /RETN/, then it is mandatory to follow the *Payments Reject/Return Guidelines* described in the *Standards MT Usage Guidelines* (Error code(s): T80).

USAGE RULES

This field may be used to provide additional information to the Receiver where no other field is available. In view of the possible delay of execution and/or rejection of the transaction(s), field 72 may only be used after bilateral agreement between the Sender and the Receiver and in encoded form.

MT 102 Checklist

This document provides a checklist which is strongly recommended to be used by financial institutions as a basis for setting up bilateral or multilateral agreements for the processing of crossborder customer payments, that is, Credit Transfers transmitted by MT 102 via FIN or FileAct.

It is recommended that all items listed be covered in the bilateral or multilateral agreements. In order to further facilitate the set up of these agreements, common procedures have been defined which financial institutions, if they wish, may override.

The checklist is not intended to provide an exhaustive list of items nor does SWIFT claim any responsibility for it.

Currencies Accepted, their Transaction Amount Limit and Settlement

Currencies Accepted

Unless otherwise agreed, multiple payment transactions are either expressed in the currency of the sending or the receiving country. If financial institutions wish to accept third currencies this should be bilaterally agreed.

Transaction Amount Limit

If financial institutions agree to define amount limits to the individual transactions, they should specify them per currency.

If the agreement allows for transactions above amounts to which specific requirements apply, for example, regulatory reporting requirements, these requirements and their formatting should be specified as well in the agreement.

Settlement

Unless otherwise agreed, direct account relationship between the Sender and the Receiver will be used for the booking of the transactions exchanged. However if they wish, financial institutions may also bilaterally agree to include third reimbursement parties in the settlement.

Whatever the agreement, transactions contained in a same message will be booked in one single entry.

For each currency accepted, the amount limit, the account number(s) used for settlement, if other than the normal one(s), and/or the third reimbursement party(ies) involved, if any, can be indicated in the chart below:

Currencies accepted	Transaction amount limit	Settlement account	Third reimbursement institutions(s) if any

Charges

Charging Options and Amounts

Unless otherwise agreed, financial institutions will accept the charging options as defined and allowed for in the MT 102. If financial institutions wish to accept only one option, this should be bilaterally agreed.

Financial institutions which accept the OUR option should agree on and specify the transaction charges in the receiving country for 'on us' and if applicable 'not on us' payments.

These transaction charges can be an exact amount or formula (percentage) and cover the guarantee and processing of transactions which the Receiver provides to the Sender until the execution in the receiving country up to the posting to the beneficiary's account. The pricing of bank-customer services, for example, for the method of advice - for daily/weekly/monthly statement for instance, being different from institution to institution are considered not to be part of the

charges.

Charges due to:	Type of payment: on us/not on us	Charges per message: formula or exact amount	Charges per transaction: formula or exact amount

The above charges are preferably set for each trimester, if necessary semester. Changes to these charges should be announced one month before the end of the term.

The messages sent as from that implementation date, will be subject to the new tariffs of the Receiver.

Charges Specifications in the MT 102

Unless otherwise agreed, the pre-agreed charges will be included in the MTs 102 exchanged, as appropriate, for information and control purposes and this in a consistent manner.

Unless otherwise agreed, charges will always be expressed in the same currency as the transaction amount(s) and settlement amount of the message.

In case the charges amounts, due to the above rule, are quoted in a currency different to the one specified in the bilateral agreement, the exchange rate should be quoted in the message exchanged.

Settlement Procedure for Charges

Unless otherwise agreed, financial institutions will separately indicate in the MT 102 the sum of charges due to the Sender and/or to the Receiver, as appropriate.

The amount settled between financial institutions with the value date specified includes at a minimum the sum of all transaction amounts. Whether the sum of charges due to the Sender and/or Receiver will also be included in the settlement amount, will depend on the agreed settlement procedure for charges. Regarding this procedure, financial institutions can agree that:

Charges are settled with same value date as the sum of all transaction amounts and booked together	
Charges are settled with same value date as the sum of all transaction amounts but booked separately	
Charges are settled periodically (once ...)	
Other	

Only when using the first or second option, the settlement amount will include the sum of charges.

Data Transmission and Bulking Criteria

Unless otherwise agreed, credit transfer transactions contained in the same MT 102 should be grouped as follows:

- operations with same bank operation code
- operations in same currency
- operations with same settlement account/institution
- operations with same value date

Financial institutions should agree whether only head office or also branches can be the Sender and/or Receiver of the MT 102 and whether FileAct and/or FIN will be used as transmission method:

	BIC Bank1	BIC Bank2
Only head-office		
Head office and all domestic branches		
Head office and a limited number of domestic branches as listed: only list party suffix and branch identifier		

In case FileAct is selected, financial institutions should agree on the maximum size of the MT 102 and whether more than one MT 102 may be contained within the same FileAct message. Financial institutions should also decide whether an MT 102 can be split over two or more FileAct messages as this may have an operational impact.

Maximum size of MT 102	Number of MT 102(s) per FileAct message	MT 102 split over two or more FileAct messages

Date and Time Frames

Financial institutions should agree on the timeframe needed by the Receiver to execute the payments accepted in its country. This timeframe starts counting as of an agreed cut-off time for receipt of incoming messages by the Receiver.

Messages received before cut-off time, will be settled on a pre-agreed day which is a (number of) day(s) following the day of receipt (day of receipt = D). For messages received after cut-off time, the settlement timeframe will be based on D+1.

D will also be the basis for calculating the execution dates (dates when the funds are available to the Beneficiary).

Date of receipt/acceptance = D

	Currency 1	Currency 2
Receiver's cut-off time		
Settlement timeframe	D (+)	D (+)
Execution timeframe for on/us payments (until funds are on the account of the Beneficiary)	D (+)	D (+)
Execution timeframe for not on/us payments (until funds are on the account of Beneficiary)	D (+)	D (+)

Level of Controls/Checks and Acceptance of Messages/Transactions

Message Level

Unless otherwise agreed, financial institutions will take as a basis for their controls/checks all security aspects of FIN or FileAct as well as the MT 102 message syntax and semantics as defined in the MT 102 message specifications.

In order to achieve straight-through processing of the MTs 102 exchanged, financial institutions should define checks and controls relating to the bilaterally agreed items.

Unless otherwise agreed, messages passing the checks and controls, are considered accepted and therefore irrevocable, that is, to be posted to the nostro/loro account. In FileAct, the positive Acknowledgement sent by the Receiver confirms acceptance of the message received. In FIN, no specific message is required.

If messages do not pass the checks/controls, they will be rejected (see the next checkpoint).

Proposed checks and controls, relating to the bilaterally agreed items, performed by the Receiver and their error codes:

Control/Check	Yes/No	Error Code
Settlement amount		
Value date		
Sender		
Currencies present		
Bulking criteria used		
Information present in field 72		
Bank operation code		
Other		

Transaction Level

Once the message is accepted, further checks are proposed to take place at transaction level. Only if transaction(s) pass the checks, will they be executed. If not, they will be rejected (see the next

checkpoint).

Proposed checks and controls performed by the Receiver including error codes prior to the execution of the transactions:

Control/Check	Yes/No	Error Code
Account number of beneficiary		
Transaction amount		
Beneficiary bank identification		
Length of remittance data		
Other		

Rejects of Messages and/or Transactions

Message Rejects

For rejects due to a communication failure between the Sender and the Receiver, the existing FIN and FileAct rules apply.

Unless otherwise agreed, messages properly received but failing to pass the message level checks (as defined in the previous checkpoint) will be rejected by the Receiver without further processing. Financial institutions are recommended to use the MT 195 in FIN or the negative acknowledgement in FileAct to advise the rejection. The reject advice should contain at a minimum the reference of the rejected message and the error code(s). The maximum delay acceptable for the Receiver to notify the Sender and possible related charges should be bilaterally agreed.

Unless otherwise agreed, the notification returned to the Sender will exempt the Receiver from processing the message. The Sender will, after correction, resubmit the message.

Transaction Rejects

The return to the originator of transactions being rejected after the message which contained them has been posted to a nostro/loro account (between the Sender and the Receiver), will cause a settlement. Unless otherwise agreed, this settlement will adhere to the following rules:

- it should be in the same currency as the original transaction currency
- it should take place at a bilaterally agreed value date
- the original transaction amount should remain unchanged
- the settlement should take place via the same account relationship
- normal banking practice prevails.

Financial institutions should agree on a maximum of working days after receipt of the MT 102 for rejecting a transaction and on the charges applied.

The following chart provides details regarding the message/transaction rejects:

	Reject of message	Reject of transaction
Maximum delay as from moment of receipt to advise the reject to Sender		
Charges due to the reject		

Cancellations

Unless otherwise agreed, messages properly received and accepted are to be considered as irrevocable. Cancellation therefore should be the exception.

If however cancellations are accepted in the bilateral agreement, the following details should be agreed:

	BIC of Bank1	BIC of Bank2
Acceptable delay for the Sender to request cancellation of message		
Acceptable delay for acceptance and response by the Receiver to such request		
Charges due to the Receiver of such request		

Financial institutions are proposed to send their request for cancellation by MT 192, for response by MT 196.

The possible interbank costs of the failure are supported by the Sender.

Modifications and Changes

Unless otherwise agreed, financial institutions will use the most up-to-date version of the MT 102 for the transmission of their transactions.

Unless otherwise agreed, financial institutions will implement changes in the message specifications of the MT 102 according to the implementation dates as announced by SWIFT

A Sender who has not done the necessary modifications in time may not be able to correctly format the transactions concerned. In this case, the Receiver is not obliged to execute the transactions. Financial institutions should agree who is liable for any costs arising from the non-execution of these transactions. Unless otherwise agreed, the costs are to be supported by the Sender.

A Receiver who has not done the necessary modifications in time may not be able to process the transactions. The Receiver will remain responsible for executing the transactions. Financial institutions should agree who is liable for any costs arising from the non-execution of these transactions. Unless otherwise agreed, the costs are to be supported by the Receiver.

MT 102 STP Multiple Customer Credit Transfer

Note: The use of this message type requires Message User Group (MUG) registration.

The MT 102 STP allows the exchange of multiple customer credit transfers using a restricted set of fields and format options of the core MT 102 to make it straight through processable. The MT 102 STP is a compatible subset of the core MT 102 that is documented separately in this section.

The differences with the core MT 102 are:

- appropriate MT 102 STP format validation is triggered by the code STP in the validation flag field 119 ({3:{119:STP}}) of the user header of the message (block 3)
- fields 52 and 57 may only be used with letter option A
- field 51A is not used in MT 102 STP. This message may only be used on the FIN SWIFT network since it requires special validation
- field 23 may only contain codes CREDIT and SPAY
- subfield 1 (Account) of field 59a is always mandatory
- field 72, code INS must be followed by a valid financial institution BIC
- field 72, codes REJT/RETN must not be used
- field 72 must not include ERI information.

IMPORTANT: To trigger the MT 102 STP format validation, the user header of the message (block 3) is mandatory and must contain the code STP in the validation flag field 119 ({3:{119:STP}}).

MT 102 STP Scope

This message is sent by or on behalf of the financial institution of the ordering customer(s) to another financial institution for payment to the beneficiary customer(s).

It requests the Receiver to credit the beneficiary customer(s) directly or indirectly through a clearing mechanism or another financial institution.

This message is used to convey multiple payment instructions between financial institutions for clean payments. Its use is subject to bilateral/multilateral agreements between Sender and Receiver.

Amongst other things, these bilateral agreements cover the transaction amount limits, the currencies accepted and their settlement. The multiple payments checklist included below is recommended as a guide for institutions in the setup of their agreements.

MT 102 STP Format Specifications

The MT 102 STP consists of three sequences:

- Sequence A General Information is a single occurrence sequence and contains information which applies to all individual transactions described in sequence B.
- Sequence B Transaction Details is a repetitive sequence. Each occurrence is used to provide details of one individual transaction.
- Sequence C Settlement Details is a single occurrence sequence and contains information about the settlement.

MT 102 STP Usage Rules

If a registered user receives an MT 102 STP without bilateral agreement with the Sender, the Receiver should query the message according to normal banking practice.

Usage Rules for Amount Related Fields

There is a relationship between the amount related fields 33B, 32B, 36, 71G, 71F, 19 and 32A which may be logically expressed in the following formulas:

- For each occurrence of sequence B, the instructed amount in field 33B, adjusted with the exchange rate in field 36, minus the Sender's charges in field(s) 71F, equals the transaction amount in field 32B.
- The sum of all transaction amounts in fields 32B, equals the total amount in field 19.
- The sum of all Receiver's charges in fields 71G of sequence B, equals the total Receiver's charges of field 71G in sequence C.
- The total amount in field 19 (or the sum of all transaction amounts in fields 32B), plus the total Receiver's charges in field 71G of sequence C, equals the interbank settled amount in field 32A.

Presence of the fields mentioned above is subject to the conditional field rules C5, C6, C7, C8, C9 and C10. If a field is not present, that field must not be taken into account in the formula. If field 71F is present more than once, all occurrences of that field must be taken into account in the formula.

Sequence A if field 71A is ...	Sequence B		
	then field 32B is ...	field 71F is ...	and field 71G is ...
OUR	Net amount to be credited to the Beneficiary. Charges have been prepaid by the ordering customer.	Not allowed	Optional

Sequence A if field 71A is ...	Sequence C		
	then field 19 is ...	field 32A is ...	and field 71G is ...
OUR	Sum of field(s) 32B of sequence B	Settlement Amount equals field 19 plus field 71G of sequence C	Sum of fields 71G of sequences B
SHA	Not used	Settlement Amount equals Sum of field(s) 32B of sequence B	Not allowed

Sequence A if field 71A is ...	Sequence C		
	then field 19 is ...	field 32A is ...	and field 71G is ...
BEN	Not used	Settlement Amount equals Sum of field(s) 32B of sequence B	Not allowed

This field must not contain information to be acted upon by the Receiver.

Due to clearing restrictions, which vary significantly from country to country, the Sender must agree to the maximum usable length of this field with the Receiver.

For STP purposes, when an ISO 11649 Creditor Reference is present in this field it must be on the first line, without any characters preceding it, and it must be the only information on that line.

16. Field 26T: Transaction Type Code

FORMAT

Option T 3!c (Type)

PRESENCE

Conditional (see rule C5) in mandatory sequence B

DEFINITION

This field identifies the nature of, purpose of, and/or reason for the individual transaction, for example, salary, pension or dividend.

USAGE RULES

The information given is intended both for regulatory and statutory requirements and/or to provide information to the beneficiary customer on the nature of the transaction.

Codes from the EUROSTAT list "Code List for Balance of Payments Collection Systems" may be used in this field.

In case the Receiver of the message is not legally obliged to forward the information to a regulatory body, he is allowed to ignore the content of this field.

17. Field 77B: Regulatory Reporting

FORMAT

Option B 3*35x (Narrative)

In addition to narrative text, the following line formats may be used:

Line 1	/8a/2!a[/additional information]	(Code)(Country Code)(Narrative)
Lines 2-3	[/continuation of additional information]	(Narrative)

PRESENCE

Conditional (see rule C5) in mandatory sequence B

DEFINITION

This field specifies the codes for the statutory and/or regulatory information required by the authorities in the country of the Receiver or the Sender.

CODES

When the residence of either the ordering customer or the beneficiary customer is to be identified, one of the following codes may be used in Code, placed between slashes ('/'):

BENEFRES	Residence of the beneficiary customer.
ORDERRES	Residence of the ordering customer.

USAGE RULES

Country Code consists of the ISO country code of the country of residence of the ordering customer or beneficiary customer.

The information specified must not have been explicitly conveyed in another field.

18. Field 33B: Currency/Instructed Amount

FORMAT

Option B 3!a15d (Currency)(Amount)

PRESENCE

DEFINITION

This field specifies the currency and amount of the instruction. This amount is provided for information purposes and has to be transported unchanged through the transaction chain.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

If field 33B is present in the message received, it has to be forwarded unchanged to the next party.

This field must be present when a currency conversion or an exchange has been performed on the Sender's side.

If the transaction is within the scope of the EC Directive on cross border credit transfers, this amount is the original ordered amount as instructed by the ordering customer. Otherwise, it is the amount that the sending bank was instructed to pay.

As a consequence, if there are no Sender's or Receiver's charges and no currency conversion or exchange took place, field 32A equals 33B, if present.

19. Field 71A: Details of Charges

FORMAT

Option A 3!a (Code)

PRESENCE

Conditional (see rule C4, also referenced in rule C8) in mandatory sequence B

DEFINITION

This field specifies which party will bear the charges for the transaction in the same occurrence of sequence B.

CODES

One of the following codes must be used (Error code(s): T08):

BEN	Beneficiary	All transaction charges are to be borne by the beneficiary customer.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

These fields are conveyed for transparency reasons.

The net amount after deduction of the Sender's charges will be quoted as the transaction amount in field 32B.

This field may be repeated to specify to the Receiver the currency and amount of charges taken by preceding banks in the transaction chain. Charges should be indicated in the order in which they have been deducted from the transaction amount, that is, the first occurrence of this field specifies the charges of the first bank in the transaction chain that deducted charges; the last occurrence always gives the Sender's charges.

21. Field 71G: Receiver's Charges

FORMAT

Option G 3!a15d (Currency)(Amount)

PRESENCE

Conditional (see rule C9, also referenced in rules C2, C8, and C10) in mandatory sequence B

This field specifies the currency and amount of the transaction charges due to the Receiver.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

NETWORK VALIDATED RULES

The integer part of Rate must contain at least one digit. A decimal comma is mandatory and is included in the maximum length (Error code(s): T40,T43).

USAGE RULES

This field must be present when a currency conversion has been performed on the Sender's side.

23. Field 32A: Value Date, Currency Code, Amount

FORMAT

Option A 6!n3!a15d (Date)(Currency)(Amount)

PRESENCE

Mandatory (referenced in rule C2) in mandatory sequence C

DEFINITION

This field specifies the value date, the currency and the settlement amount. The settlement amount is the amount to be booked/reconciled at interbank level.

USAGE RULES

Where field 71A indicates OUR payments, this field contains the sum of the amounts specified in the fields 19 and 71G.

Where field 71A indicates SHA or BEN payments, this field contains the total of all fields 32B.

24. Field 19: Sum of Amounts

USAGE RULES

This field is only to be used where the sum of amounts is different from the settlement amount specified in field 32A, that is, when one or more transactions in sequence B contains the charging option OUR in field 71A.

25. Field 71G: Sum of Receiver's Charges

FORMAT

Option G 3!a15d (Currency)(Amount)

PRESENCE

USAGE RULES

Where field 71A indicates OUR payments either in sequence A, or in one or more occurrences of sequence B, this field identifies the sum of the charges due, which has been prepaid and included in the interbank settlement amount.

For transparency or accounting reasons, this field is not to be used when field 71A, either in sequence A or in all occurrences of sequence B, indicates BEN or SHA payments.

26. Field 13C: Time Indication**FORMAT**

Option C /8c/4!n1!x4!n (Code)(Time indication)(Sign)(Time offset)

PRESENCE

Optional in mandatory sequence C

DEFINITION

This repetitive field specifies one or several time indication(s) related to the processing of the payment instruction.

CODES

One of the following codes may be used in Code, placed between slashes ('/').

CLSTIME	CLS Time	The time by which the funding payment must be credited, with confirmation, to the CLS Bank's account at the central bank, expressed in Central European Time (CET).
RNCTIME	Receive Time	The time at which a TARGET2 payment was credited at the receiving central bank, expressed in Central European Time (CET).
SNDDTIME	Send Time	The time at which a TARGET2 payment was debited at the sending central bank, expressed in Central European Time (CET).

CODES

One of the following codes must be used in Sign (Error code(s): T15):

+	Plus	The + sign.
-	Minus	The - sign.

NETWORK VALIDATED RULES

Time indication must be a valid time expressed as HHMM (Error code(s): T38).

Time offset is expressed as 'HHMM', where the hour component, that is, 'HH', must be in the range of 00 through 13, and the minute component, that is, 'MM' must be in the range of 00 through 59. Any 'HH' or 'MM' component outside of these range checks will be disallowed (Error code(s): T16).

USAGE RULES

The time zone in which date and Time are expressed is to be identified by means of the offset against the UTC (Coordinated Universal Time - ISO 8601).

27. Field 53a: Sender's Correspondent

FORMAT

Option A	[/1!a][/34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option C	/34x	(Account)

PRESENCE

Optional in mandatory sequence C

DEFINITION

Where required, this field specifies the account or branch of the Sender or another financial institution through which the Sender will reimburse the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

Absence of this field implies that the bilaterally agreed account is to be used for settlement.

Option A is the preferred option.

Option C must be used where only an account number is to be specified.

In those cases where there are multiple direct account relationships, in the currency of the transaction, between the Sender and the Receiver, and one of these accounts is to be used for reimbursement, the account to be credited or debited must be indicated in field 53a.

If there is no direct account relationship, in the currency of the transaction, between the Sender and the Receiver (or branch of the Receiver when specified in field 54A), then field 53A must be present.

When field 53A is present and contains a branch of the Sender, the need for a cover message is dependent on the currency of the transaction, the relationship between the Sender and the Receiver and the contents of field 54A, if present.

A branch of the Receiver may appear in field 53A if the financial institution providing reimbursement is both the Sender's correspondent and a branch of the Receiver, and the Sender intends to send a cover message to the branch of the Receiver. In this case, the Receiver will be paid by its branch in field 53A.

In all other cases, when field 53A is present, a cover message, that is, MT 202/203 or equivalent non-SWIFT must be sent to the financial institution identified in field 53A.

The use and interpretation of fields 53a and 54a is, in all cases, dictated by the currency of the transaction and the correspondent relationship between the Sender and the Receiver relative to that currency.

28. Field 54A: Receiver's Correspondent

FORMAT

Option A	[/1!a]/[34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
----------	--------------------------------	---

PRESENCE

Optional in mandatory sequence C

DEFINITION

Where required, this field specifies the branch of the Receiver or another financial institution at which the funds will be made available to the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

The absence of fields 53a and 54A implies that the single direct account relationship between the Sender and the Receiver, in the currency of the transfer, will be used.

In those cases where field 54A contains a branch of the Receiver, and is not preceded by field 53a, or field 53a contains an account of the Sender serviced by the Receiver's branch, the Receiver will claim reimbursement from its branch.

If field 54A contains a branch of the Receiver and field 53A contains a branch of the Sender, the Receiver will claim reimbursement from its branch or will be paid by its branch, depending on the currency of the transfer and the relationship between the Sender and the Receiver.

In all other cases where field 54A contains a branch of the Receiver, the Receiver will be paid by its branch in field 54A.

A branch of the Sender must not appear in field 54A.

If the branch of the Sender or other financial institution specified in field 53A is also the account servicer for the Receiver, field 54A must not be present.

Field 54A containing the name of a financial institution other than the Receiver's branch must be preceded by field 53A; the Receiver will be paid by the financial institution in field 54A.

The use and interpretation of fields 53a and 54A is in all cases dictated by the currency of the transaction and the correspondent relationship between the Sender and Receiver relative to that currency.

29. Field 72: Sender to Receiver Information

FORMAT

6*35x (Narrative Structured Format)

The following line formats must be used:

Line 1	/8c/[additional information]	(Code)(Narrative)
Lines 2-6	[//continuation of additional information]	(Narrative)
	or	or
	[/8c/[additional information]]	(Code)(Narrative)

PRESENCE

Optional in mandatory sequence C

DEFINITION

This field specifies additional information for the Receiver.

CODES

Unless bilaterally agreed otherwise between the Sender and the Receiver, the following code may be used in Code, placed between slashes ('/')

INS	Instructing institution	The instructing institution which instructed the Sender to execute the transaction.
-----	-------------------------	---

NETWORK VALIDATED RULES

If the code /INS/ is used at the beginning of a line, it must be followed by a valid financial institution BIC and be the only information on that line (Error code(s): T27,T28,T29,T44,T45,T46).

If the code /INS/ is present at the beginning of a line, it must not be used again at the beginning of any other line (Error code(s): T47).

If the code /INS/ is used anywhere else than at the beginning of a line, it is treated as free text and is ignored as far as validation is concerned. In this case, there is no validation of the following BIC either.

The codes /REJT/ or /RETN/ must not be used in this field (Error code(s): T81).

This field must not include ERI (Error code(s): T82).

USAGE RULES

Field 72 must never be used for information for which another field is intended.

Each item for which a code exists must start with that code and may be completed with additional information.

Each code used must be between slashes and appear at the beginning of a line. It may be followed by additional narrative text.

Narrative text relating to a preceding code, which is continued on the next line(s), must start with a double slash '//', and, if used, must begin on a new line. Narrative text should preferably be the last information in this field.

Use of field 72 with uncoded instructions is not allowed.

It is strongly recommended to use the standard code proposed above. In any case, where bilateral agreements covering the use of codes in this field are in effect, the code must conform to the structured format of this field.

If code INS is present in field 72 of a received message, then the code and the related details must be passed, unchanged, in field 72 of the subsequent message in the payment chain. Additional codes and details may be added to field 72 of the subsequent message but the original INS and related details must not be altered or removed.

MT 102 STP Checklist

This document provides a checklist which is strongly recommended to be used by financial institutions as a basis for setting up bilateral or multilateral agreements for the processing of crossborder customer payments, that is, Credit Transfers transmitted by MT 102 STP via FIN.

It is recommended that all items listed be covered in the bilateral or multilateral agreements. In order to further facilitate the set up of these agreements, common procedures have been defined which financial institutions, if they wish, may override.

The checklist is not intended to provide an exhaustive list of items nor does SWIFT claim any responsibility for it.

Currencies Accepted, their Transaction Amount Limit and Settlement

Currencies Accepted

Unless otherwise agreed, multiple payment transactions are either expressed in the currency of the sending or the receiving country. If financial institutions wish to accept third currencies this should be bilaterally agreed.

Transaction Amount Limit

If financial institutions agree to define amount limits to the individual transactions, they should specify them per currency.

If the agreement allows for transactions above amounts to which specific requirements apply, for example, regulatory reporting requirements, these requirements and their formatting should be specified as well in the agreement.

Settlement

Unless otherwise agreed, direct account relationship between the Sender and the Receiver will be used for the booking of the transactions exchanged. However if they wish, financial institutions may also bilaterally agree to include third reimbursement parties in the settlement.

Whatever the agreement, transactions contained in a same message will be booked in one single entry.

For each currency accepted, the amount limit, the account number(s) used for settlement, if other than the normal one(s), and/or the third reimbursement party(ies) involved, if any, can be indicated in the chart below:

Currencies accepted	Transaction amount limit	Settlement account	Third reimbursement institutions(s) if any

Charges

Charging Options and Amounts

Unless otherwise agreed, financial institutions will accept the charging options as defined and allowed for in the MT 102 STP. If financial institutions wish to accept only one option, this should be bilaterally agreed.

Financial institutions which accept the OUR option should agree on and specify the transaction charges in the receiving country for 'on us' and if applicable 'not on us' payments.

These transaction charges can be an exact amount or formula (percentage) and cover the guarantee and processing of transactions which the Receiver provides to the Sender until the execution in the receiving country up to the posting to the beneficiary's account. The pricing of bank-customer services, for example, for the method of advice - for daily/weekly/monthly statement for instance, being different from institution to institution are considered not to be part of the

charges.

Charges due to:	Type of payment: on us/not on us	Charges per message: formula or exact amount	Charges per transaction: formula or exact amount

The above charges are preferably set for each trimester, if necessary semester. Changes to these charges should be announced one month before the end of the term.

The messages sent as from that implementation date, will be subject to the new tariffs of the Receiver.

Charges Specifications in the MT 102 STP

Unless otherwise agreed, the pre-agreed charges will be included in the MTs 102 STP exchanged, as appropriate, for information and control purposes and this in a consistent manner.

Unless otherwise agreed, charges will always be expressed in the same currency as the transaction amount(s) and settlement amount of the message.

In case the charges amounts, due to the above rule, are quoted in a currency different to the one specified in the bilateral agreement, the exchange rate should be quoted in the message exchanged.

Settlement Procedure for Charges

Unless otherwise agreed, financial institutions will separately indicate in the MT 102 STP the sum of charges due to the Sender and/or to the Receiver, as appropriate.

The amount settled between financial institutions with the value date specified includes at a minimum the sum of all transaction amounts. Whether the sum of charges due to the Sender and/or Receiver will also be included in the settlement amount, will depend on the agreed settlement procedure for charges. Regarding this procedure, financial institutions can agree that:

Charges are settled with same value date as the sum of all transaction amounts and booked together	
Charges are settled with same value date as the sum of all transaction amounts but booked separately	
Charges are settled periodically (once ...)	
Other	

Only when using the first or second option, the settlement amount will include the sum of charges.

Data Transmission and Bulking Criteria

Unless otherwise agreed, credit transfer transactions contained in the same MT 102 STP should be grouped as follows:

- operations with same bank operation code
- operations in same currency
- operations with same settlement account/institution
- operations with same value date

Financial institutions should agree whether only head office or also branches can be the Sender and/or Receiver of the MT 102 STP:

	BIC Bank1	BIC Bank2
Only head-office		
Head office and all domestic branches		
Head office and a limited number of domestic branches as listed: only list party suffix and branch identifier		

Date and Time Frames

Financial institutions should agree on the timeframe needed by the Receiver to execute the payments accepted in its country. This timeframe starts counting as of an agreed cut-off time for receipt of incoming messages by the Receiver.

Messages received before cut-off time, will be settled on a pre-agreed day which is a (number of) day(s) following the day of receipt (day of receipt = D). For messages received after cut-off time, the settlement timeframe will be based on D+1.

D will also be the basis for calculating the execution dates (dates when the funds are available to the Beneficiary).

Date of receipt/acceptance = D

	Currency 1	Currency 2
Receiver's cut-off time		
Settlement timeframe	D (+)	D (+)
Execution timeframe for on/us payments (until funds are on the account of the Beneficiary)	D (+)	D (+)
Execution timeframe for not on/us payments (until funds are on the account of Beneficiary)	D (+)	D (+)

Level of Controls/Checks and Acceptance of Messages/Transactions

Message Level

Unless otherwise agreed, financial institutions will take as a basis for their controls/checks all security aspects of FIN as defined in the SWIFT FIN User Handbook as well as the MT 102 STP message syntax and semantics as defined in the MT 102 STP message specifications.

In order to achieve straight-through processing of the MTs 102 STP exchanged, financial institutions should define checks and controls relating to the bilaterally agreed items.

Unless otherwise agreed, messages passing the checks and controls, are considered accepted and therefore irrevocable, that is, to be posted to the nostro/loro account.

If messages do not pass the checks/controls, they will be rejected (see the next checkpoint).

Proposed checks and controls, relating to the bilaterally agreed items, performed by the Receiver and their error codes:

Control/Check	Yes/No	Error Code
Settlement amount		
Value date		
Sender		
Currencies present		
Bulking criteria used		
Information present in field 72		
Bank operation code		
Other		

Transaction Level

Once the message is accepted, further checks are proposed to take place at transaction level. Only if transaction(s) pass the checks, will they be executed. If not, they will be rejected (see the next checkpoint).

Proposed checks and controls performed by the Receiver including error codes prior to the execution of the transactions:

Control/Check	Yes/No	Error Code
Account number of beneficiary		
Transaction amount		
Beneficiary bank identification		
Length of remittance data		
Other		

Rejects of Messages and/or Transactions

Message Rejects

For rejects due to a communication failure between the Sender and the Receiver, the existing FIN rules apply.

Unless otherwise agreed, messages properly received but failing to pass the message level checks (as defined in the previous checkpoint) will be rejected by the Receiver without further processing. Financial institutions are recommended to use the MT 195 to advise the rejection. The reject advice should contain at a minimum the reference of the rejected message and the error code(s). The maximum delay acceptable for the Receiver to notify the Sender and possible related charges should be bilaterally agreed.

Unless otherwise agreed, the notification returned to the Sender will exempt the Receiver from processing the message. The Sender will, after correction, resubmit the message.

Transaction Rejects

The return to the originator of transactions being rejected after the message which contained them has been posted to a nostro/loro account (between the Sender and the Receiver), will cause a settlement. Unless otherwise agreed, this settlement will adhere to the following rules:

- it should be in the same currency as the original transaction currency
- it should take place at a bilaterally agreed value date
- the original transaction amount should remain unchanged
- the settlement should take place via the same account relationship
- normal banking practice prevails.

Financial institutions should agree on a maximum of working days after receipt of the MT 102 for rejecting a transaction and on the charges applied.

The following chart provides details regarding the message/transaction rejects:

	Reject of message	Reject of transaction
Maximum delay as from moment of receipt to advise the reject to Sender		
Charges due to the reject		

Cancellations

Unless otherwise agreed, messages properly received and accepted are to be considered as irrevocable. Cancellation therefore should be the exception.

If however cancellations are accepted in the bilateral agreement, the following details should be agreed:

	BIC of Bank1	BIC of Bank2
Acceptable delay for the Sender to request cancellation of message		
Acceptable delay for acceptance and response by the Receiver to such request		
Charges due to the Receiver of such request		

Financial institutions are proposed to send their request for cancellation by MT 192, for response by MT 196.

The possible interbank costs of the failure are supported by the Sender.

Modifications and Changes

Unless otherwise agreed, financial institutions will use the most up-to-date version of the MT 102 STP for the transmission of their transactions.

Unless otherwise agreed, financial institutions will implement changes in the message specifications of the MT 102 STP according to the implementation dates as announced by SWIFT

A Sender who has not done the necessary modifications in time may not be able to correctly format the transactions concerned. In this case, the Receiver is not obliged to execute the transactions. Financial institutions should agree who is liable for any costs arising from the non-execution of these transactions. Unless otherwise agreed, the costs are to be supported by the Sender.

A Receiver who has not done the necessary modifications in time may not be able to process the transactions. The Receiver will remain responsible for executing the transactions. Financial institutions should agree who is liable for any costs arising from the non-execution of these transactions. Unless otherwise agreed, the costs are to be supported by the Receiver.

MT 103 Single Customer Credit Transfer

The MT 103 is a General Use message, that is, no registration in a Message User Group (MUG) is necessary to send and receive this message. It allows the exchange of single customer credit transfers using all MT 103 fields. The MT 103 can be straight through processable if the message is properly formatted according to pre-agreed bilateral/multilateral rules.

Two variants of the MT 103 exist and these are documented separately:

1. The MT 103 STP is a general use message, that is, no registration in a MUG is necessary to send and receive this message. It allows for the exchange of single customer credit transfers using a network-validated, restricted set of fields and format options of the MT 103 to make it straight through processable.
2. The MT 103 REMIT requires registration in the Extended Remittance Information MUG. This MUG allows its subscribers to exchange MT 103 REMIT messages with an extended amount of remittance information in the additional field 77T Envelope Contents. This remittance information may optionally be exchanged in a non-SWIFT format, such as EDIFACT or ANSI-X12.

IMPORTANT: User header block (block 3) must be present and must contain field 121 Unique End-to-end Transaction Reference (UETR). In cases where the sender is acting as intermediary and a UETR was present in the received message, the UETR must be passed, unchanged, to the next message in the transaction chain. In all other cases a new UETR must be used. Details of the format of the user header block and field 121, and also the required order of fields in the user header block, can be found in the FIN Operations Guide.

MT 103 Scope

This message type is sent by or on behalf of the financial institution of the ordering customer, directly or through (a) correspondent(s), to the financial institution of the beneficiary customer.

It is used to convey a funds transfer instruction in which the ordering customer or the beneficiary customer, or both, are non-financial institutions from the perspective of the Sender.

This message may only be used for clean payment instructions. It must not be used to advise the remitting bank of a payment for a clean, for example, cheque, collection, nor to provide the cover for a transaction whose completion was advised separately, for example, via an MT 400.

 - copy the content of field 20 of the MT 103 unchanged into field 21 of the related MT 202 COV;
 - copy the content of field 121, in the user header block, of the MT 103 unchanged into field 121, in the user header block, of the related MT 202 COV.

- [When the receiver of an MT 103 either credits the account of the beneficiary customer or rejects the payment, a confirmation to Tracker \(TRCKCHZZ\) is mandatory. Business rules and technical specifications of the confirmation are available on the Knowledge Centre > Products A-Z > FIN > Universal Confirmations for MT 103 Rulebook.](#)
- Field 72 may only be present when it is structured, that is, only contains coded information.
- When sending the message via FileAct, institutions should bilaterally agree on the maximum size of the message.

Usage Rules for Amount Related Fields

There is a relationship between the amount related fields 33B, 36, 71G, 71F and 32A which may be logically expressed in the following formula:

- The instructed amount in field 33B, adjusted with the exchange rate in field 36, plus the Receiver's charges in field 71G, minus the Sender's charges in field(s) 71F, equals the interbank settled amount in field 32A.

Presence of the fields mentioned above is subject to the conditional field rules C1, C2, C14 and C15. If a field is not present, that field must not be taken into account in the formula. If field 71F is present more than once, all occurrences of that field must be taken into account in the formula.

Examples: Transaction A

- Pay the equivalent of EUR 1000,00 in GBP to a beneficiary in the United Kingdom
- Exchange rate is 1 EUR for 0,61999 GBP
- Transaction charges on the Sender's side are EUR 5,00 (=GBP 3,1)
- Transaction charges on the Receiver's side are GBP 4 (=EUR 6,45)

MT 103 Market Practice Rules

As indicated in the MT 103 Guidelines, when an MT 103 is sent using the cover method, an MT 202 COV message must be sent to cover the transfer. A credit to a beneficiary's account that is based on the receipt of an MT 103, without receipt of the related cover payment, is a policy decision. Institutions have deployed processes that are approved by their internal risk committees; the risk lies clearly with the beneficiary institution. Guidelines for the processing of an MT 103 sent with the cover method have been published by the Payments Market Practice Group (PMPG).

For more details, see the market practice document *Guidelines for use of the MT 202 COV* on www.pmpg.info.

MT 103 Guidelines

- If the Sender and the Receiver wish to use their direct account relationship in the currency of the transfer, then the MT 103 message will contain the cover for the customer transfer as well as the payment details.
- If the Sender and the Receiver have no direct account relationship in the currency of the transfer or do not wish to use their account relationship, then third banks will be involved to cover the transaction. The MT 103 contains only the payment details and the Sender must cover the customer transfer by sending an MT 202 COV General Financial Institution Transfer

to a third bank. This payment method is called 'cover'.

- Where more than two financial institutions are involved in the payment chain, and if the MT 103 is sent from one financial institution to the next financial institution in this chain, then the payment method is called 'serial'.
- If the Receiver does not service an account for the beneficiary customer, and no account servicing institution is indicated, nor any alternative instructions given, then the Receiver will act upon the customer credit transfer instruction in an appropriate manner of its choice.
- In order to allow better reconciliation by the beneficiary customer, the MT 103 supports full charges transparency and structured remittance information.
- In order to allow better reconciliation by the Receiver, the MT 103 gives an unambiguous indication of the interbank amount booked by the Sender/to be booked by the Receiver.
- The MT 103 gives the Sender the ability to identify in the message the level of service requested, that is, what service is expected from the Receiver for a particular payment, for example, SWIFTPay, Standard or Priority or any other bilaterally agreed service.
- The message also allows for the inclusion of regulatory information in countries where regulatory reporting is requested.

Option B	[/1!a]/[34x] [35x]	(Party Identifier) (Location)
Option D	[/1!a]/[34x] 4*35x	(Party Identifier) (Name and Address)

PRESENCE

Conditional (see rules C4, C5, and C7)

DEFINITION

Where required, this field specifies the account or branch of the Sender or another financial institution through which the Sender will reimburse the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

Absence of this field implies that there is a unique account relationship between the Sender and the Receiver or that the bilaterally agreed account is to be used for settlement.

Option A is the preferred option.

In those cases where there are multiple direct account relationships, in the currency of the transaction, between the Sender and the Receiver, and one of these accounts is to be used for reimbursement, the account to be credited or debited must be indicated in field 53a, using option B with the party identifier only.

If there is no direct account relationship, in the currency of the transaction, between the Sender and the Receiver (or branch of the Receiver when specified in field 54a), then field 53a must be present.

When field 53a is present and contains a branch of the Sender, the need for a cover message is dependent on the currency of the transaction, the relationship between the Sender and the Receiver and the contents of field 54a, if present.

A branch of the Receiver may appear in field 53a if the financial institution providing reimbursement is both the Sender's correspondent and a branch of the Receiver, and the Sender intends to send a cover message to the branch of the Receiver. In this case, the Receiver will be paid by its branch in field 53a.

In all other cases, when field 53a is present, a cover message, that is, MT 202 COV or equivalent non-SWIFT must be sent to the financial institution identified in field 53a.

When field 53B is used to specify a branch city name, it must always be a branch of the Sender.

The use and interpretation of fields 53a and 54a is, in all cases, dictated by the currency of the transaction and the correspondent relationship between the Sender and Receiver relative to that currency.

Option B must only be used with a location.

In those cases where field 54a contains a branch of the Receiver, and is not preceded by field 53a, or field 53a contains an account of the Sender serviced by the Receiver's branch, the Receiver will claim reimbursement from its branch.

If field 54a contains a branch of the Receiver and field 53a contains a branch of the Sender, the Receiver will claim reimbursement from its branch or will be paid by its branch, depending on the currency of the transfer and the relationship between the Sender and the Receiver.

In all other cases where field 54a contains a branch of the Receiver, the Receiver will be paid by its branch in field 54a.

A branch of the Sender must not appear in field 54a.

If the branch of the Sender or other financial institution specified in field 53a is also the account servicer for the Receiver, field 54a must not be present.

Field 54a containing the name of a financial institution other than the Receiver's branch must be preceded by field 53a; the Receiver will be paid by the financial institution in field 54a.

USAGE RULES

This field is conveyed for accounting reasons, that is, to facilitate bookkeeping.

Where field 71A indicates OUR payments, this field identifies the charges due, which have been prepaid and included in the interbank settlement amount.

22. Field 72: Sender to Receiver Information

FORMAT

6*35x (Narrative Structured Format)

The following line formats must be used:

Line 1	/8c/[additional information]	(Code)(Narrative)
Lines 2-6	[//continuation of additional information]	(Narrative)
	or	or
	[/8c/[additional information]]	(Code)(Narrative)

PRESENCE

Optional

DEFINITION

This field specifies additional information for the Receiver or other party specified.

CODES

Unless bilaterally agreed otherwise between the Sender and the Receiver, one of the following codes must be used in Code, placed between slashes ('/'):

ACC	Account with institution	Instructions following are for the account with institution.
INS	Instructing institution	The instructing institution which instructed the Sender or previous institution in the transaction chain, to execute the transaction.
INT	Intermediary institution	Instructions following are for the intermediary institution.

NETWORK VALIDATED RULES

If the first six characters in line 1 contain the character string /REJT/ or /RETN/, then it is mandatory to follow the *Payments Reject/Return Guidelines* described in the *Standards MT Usage Guidelines*(Error code(s): T80).

USAGE RULES

Field 72 must never be used for information for which another field is intended.

Each item for which a code exists must start with that code and may be completed with additional information.

Each code used must be between slashes and appear at the beginning of a line. It may be followed by additional narrative text.

Narrative text relating to a preceding code, which is continued on the next line(s), must start with a double slash '//', and, if used, must begin on a new line. Narrative text should preferably be the last information in this field.

Use of field 72, particularly with uncoded instructions, may cause delay, because, in automated systems, the presence of this field will normally require manual intervention.

It is strongly recommended to use the standard codes proposed above. In any case, where bilateral agreements covering the use of codes in this field are in effect, the code must conform to the structured format of this field.

The code INS may be repeated to specify all previously involved financial institutions in the transaction chain .

Instructing institutions should be indicated in the order in which they were involved in the transaction chain, that is, the first occurrence specifies the financial institution that received the instruction from the ordering institution and passed it on to the next institution in the transaction chain; the last occurrence always indicates the institution that instructed the sender of this message to execute the transaction.

If codes INS or ACC are present in field 72 of a received message, then these codes and the related details must be passed, unchanged, in field 72 of the subsequent message in the payment chain. Additional codes and details may be added to field 72 of the subsequent message but the original INS and ACC and related details must not be altered or removed.

23. Field 77B: Regulatory Reporting

FORMAT

Option B	3*35x	(Narrative)
----------	-------	-------------

In addition to narrative text, the following line formats may be used:

Line 1	/8a/2!a[/additional information]	(Code)(Country Code)(Narrative)
Lines 2-3	[//continuation of additional information]	(Narrative)

PRESENCE

Optional

DEFINITION

This field specifies the codes for the statutory and/or regulatory information required by the authorities in the country of Receiver or Sender.

CODES

Where the residence of either the ordering customer or the beneficiary customer is to be identified, one of the following codes may be used in Code, placed between slashes ("/"):

BENEFRES	Residence of the beneficiary customer.
ORDERRES	Residence of the ordering customer.

USAGE RULES

Country Code consists of the ISO country code of the country of residence of the ordering customer or beneficiary customer.

The information specified must not have been explicitly conveyed in another field.

MT 103 REMIT Single Customer Credit Transfer

The MT 103 REMIT requires registration in the Extended Remittance Information message user group. This message user group allows its subscribers to exchange MT 103 REMIT messages with an extended amount of remittance information in field 77T. This remittance information may optionally be exchanged in a non-SWIFT format, such as EDIFACT or ANSI-X12.

The differences with the core MT 103 are:

- MT 103 REMIT requires registration in the Extended Remittance Information message user group.
- The user header (block 3 of the message) must contain the code REMIT in field 119 ({3:{119:REMIT}}).
- MT 103 REMIT has no field 70 Remittance Information.
- MT 103 REMIT has a field 77T Envelope Contents for extended remittance information.

IMPORTANT: User header block (block 3) must be present and must contain field 119 Validation Flag, with code REMIT, and field 121 Unique End-to-end Transaction Reference (UETR). In cases where the sender is acting as intermediary and a UETR was present in the received message, the UETR must be passed, unchanged, to the next message in the transaction chain. In all other cases, a new UETR must be used. Details of the format of the user header block and field 121, and also the required order of fields in the user header block, can be found in the FIN Operations Guide.

MT 103 REMIT Scope

This message type is sent by or on behalf of the financial institution of the ordering customer, directly or through (a) correspondent(s), to the financial institution of the beneficiary customer.

It is used to convey a funds transfer instruction in which the ordering customer or the beneficiary customer, or both, are non-financial institutions from the perspective of the Sender.

This message may only be used for clean payment instructions. It must not be used to advise the remitting bank of a payment for a clean, for example, cheque, collection, nor to provide the cover for a transaction whose completion was advised separately, for example, via an MT 400.

MT 103 REMIT Usage Rules

- When the cover method is used for a customer credit transfer, the originating bank must:
 - copy the content of field 20 of the MT 103 REMIT unchanged into field 21 of the related MT 202 COV;
 - copy the content of field 121, in the user header block, of the MT 103 REMIT unchanged into field 121, in the user header block, of the related MT 202 COV.

- [When the receiver of an MT 103 REMIT either credits the account of the beneficiary customer or rejects the payment, a confirmation to Tracker \(TRCKCHZZ\) is mandatory. Business rules and technical specifications of the confirmation are available on the Knowledge Centre > Products A-Z > FIN > Universal Confirmations for MT 103 Rulebook.](#)
- Field 72 may only be present when it is structured, that is, only contains coded information.
- When sending the message via FileAct, institutions should bilaterally agree on the maximum size of the message.

Usage Rules for Amount Related Fields

There is a relationship between the amount related fields 33B, 36, 71G, 71F and 32A which may be logically expressed in the following formula:

- The instructed amount in field 33B, adjusted with the exchange rate in field 36, plus the Receiver's charges in field 71G, minus the Sender's charges in field(s) 71F, equals the interbank settled amount in field 32A.

Presence of the fields mentioned above is subject to the conditional field rules C1, C2, C14 and C15. If a field is not present, that field must not be taken into account in the formula. If field 71F is present more than once, all occurrences of that field must be taken into account in the formula.

Examples: Transaction A

- Pay the equivalent of EUR 1000,00 in GBP to a beneficiary in the United Kingdom
- Exchange rate is 1 EUR for 0,61999 GBP
- Transaction charges on the Sender's side are EUR 5,00 (=GBP 3,1)
- Transaction charges on the Receiver's side are GBP 4 (=EUR 6,45)

MT 103 REMIT Market Practice Rules

As indicated in the MT 103 REMIT Guidelines, when an MT 103 REMIT is sent using the cover method, an MT 202 COV message must be sent to cover the transfer. A credit to a beneficiary's account that is based on the receipt of an MT 103 REMIT, without receipt of the related cover payment, is a policy decision. Institutions have deployed processes that are approved by their internal risk committees; the risk lies clearly with the beneficiary institution. Guidelines for the processing of an MT 103 REMIT sent with the cover method have been published by the Payments Market Practice Group (PMPG).

For more details, see the market practice document *Guidelines for use of the MT 202 COV* on www.pmpg.info.

MT 103 REMIT Guidelines

- If the Sender and the Receiver wish to use their direct account relationship in the currency of the transfer, then the MT 103 REMIT message will contain the cover for the customer transfer as well as the payment details.
- If the Sender and the Receiver have no direct account relationship in the currency of the transfer or do not wish to use their account relationship, then third banks will be involved to cover the transaction. The MT 103 REMIT contains only the payment details and the Sender

must cover the customer transfer by sending an MT 202 COV General Financial Institution Transfer to a third bank. This payment method is called 'cover'.

- Where more than two financial institutions are involved in the payment chain, and if the MT 103 REMIT is sent from one financial institution to the next financial institution in this chain, then the payment method is called 'serial'.
- If the Receiver does not service an account for the beneficiary customer, and no account servicing institution is indicated, nor any alternative instructions given, then the Receiver will act upon the customer credit transfer instruction in an appropriate manner of its choice.
- In order to allow better reconciliation by the beneficiary customer, the MT 103 REMIT supports full charges transparency and structured remittance information.
- In order to allow better reconciliation by the Receiver, the MT 103 REMIT gives an unambiguous indication of the interbank amount booked by the Sender/to be booked by the Receiver.
- The MT 103 REMIT gives the Sender the ability to identify in the message the level of service requested, that is, what service is expected from the Receiver for a particular payment, for example, SWIFTPay, Standard or Priority or any other bilaterally agreed service.
- The message also allows for the inclusion of regulatory information in countries where regulatory reporting is requested.

Option D	[/1!a]/[34x] 4*35x	(Party Identifier) (Name and Address)

PRESENCE

Conditional (see rules C4, C5, and C7)

DEFINITION

Where required, this field specifies the account or branch of the Sender or another financial institution through which the Sender will reimburse the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

Absence of this field implies that there is a unique account relationship between the Sender and the Receiver or that the bilaterally agreed account is to be used for settlement.

Option A is the preferred option.

In those cases where there are multiple direct account relationships, in the currency of the transaction, between the Sender and the Receiver, and one of these accounts is to be used for reimbursement, the account to be credited or debited must be indicated in field 53a, using option B with the party identifier only.

If there is no direct account relationship, in the currency of the transaction, between the Sender and the Receiver (or branch of the Receiver when specified in field 54a), then field 53a must be present.

When field 53a is present and contains a branch of the Sender, the need for a cover message is dependent on the currency of the transaction, the relationship between the Sender and the Receiver and the contents of field 54a, if present.

A branch of the Receiver may appear in field 53a if the financial institution providing reimbursement is both the Sender's correspondent and a branch of the Receiver, and the Sender intends to send a cover message to the branch of the Receiver. In this case, the Receiver will be paid by its branch in field 53a.

In all other cases, when field 53a is present, a cover message, that is, MT 202 COV or equivalent non-SWIFT must be sent to the financial institution identified in field 53a.

When field 53B is used to specify a branch city name, it must always be a branch of the Sender.

The use and interpretation of fields 53a and 54a is, in all cases, dictated by the currency of the transaction and the correspondent relationship between the Sender and Receiver relative to that currency.

Option B must only be used with a location.

In those cases where field 54a contains a branch of the Receiver, and is not preceded by field 53a, or field 53a contains an account of the Sender serviced by the Receiver's branch, the Receiver will claim reimbursement from its branch.

If field 54a contains a branch of the Receiver and field 53a contains a branch of the Sender, the Receiver will claim reimbursement from its branch or will be paid by its branch, depending on the currency of the transfer and the relationship between the Sender and the Receiver.

In all other cases where field 54a contains a branch of the Receiver, the Receiver will be paid by its branch in field 54a.

A branch of the Sender must not appear in field 54a.

If the branch of the Sender or other financial institution specified in field 53a is also the account servicer for the Receiver, field 54a must not be present.

Field 54a containing the name of a financial institution other than the Receiver's branch must be preceded by field 53a; the Receiver will be paid by the financial institution in field 54a.

Option C must be used containing a 2!a clearing system code preceded by a double slash '//'.

Option D must only be used in exceptional circumstances: when the party cannot be identified by a financial institution BIC, when there is a need to be able to specify a name and address, for example, due to regulatory considerations or when there is a bilateral agreement between the Sender and the Receiver permitting its use.

When qualified by a clearing system code or an account number, the use of option D may enable the automated processing of the instruction(s) by the Receiver.

NETWORK VALIDATED RULES

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03,T40,T43).

USAGE RULES

These fields are conveyed for transparency reasons.

The net amount after deduction of the Sender's charges will be quoted as the inter-bank settled amount in field 32A.

This field may be repeated to specify to the Receiver the currency and amount of charges taken by preceding banks in the transaction chain. Charges should be indicated in the order in which they have been deducted from the transaction amount, that is, the first occurrence of this field specifies the charges of the first bank in the transaction chain that deducted charges; the last occurrence always gives the Sender's charges.

20. Field 71G: Receiver's Charges

Option G 3!a15d (Currency)(Amount)

The following line formats must be used:

Line 1	/8c/[additional information]	(Code)(Narrative)
Lines 2-6	[//continuation of additional information]	(Narrative)
	or	or
	[/8c/[additional information]]	(Code)(Narrative)

PRESENCE

Optional

DEFINITION

This field specifies additional information for the Receiver or other party specified.

CODES

Unless bilaterally agreed otherwise between the Sender and the Receiver, one of the following codes must be used in Code, placed between slashes ('/');

ACC	Account with institution	Instructions following are for the account with institution.
INS	Instructing institution	The instructing institution which instructed the Sender or previous institution in the transaction chain, to execute the transaction.
INT	Intermediary institution	Instructions following are for the intermediary institution.

NETWORK VALIDATED RULES

If the first six characters in line 1 contain the character string /REJT/ or /RETN/, then it is mandatory to follow the *Payments Reject/Return Guidelines* described in the *Standards MT Usage Guidelines* (Error code(s): T80).

USAGE RULES

Field 72 must never be used for information for which another field is intended.

Each item for which a code exists must start with that code and may be completed with additional information.

Each code used must be between slashes and appear at the beginning of a line. It may be followed by additional narrative text.

Narrative text relating to a preceding code, which is continued on the next line(s), must start with a double slash '//', and, if used, must begin on a new line. Narrative text should preferably be the last information in this field.

Use of field 72, particularly with uncoded instructions, may cause delay, because, in automated systems, the presence of this field will normally require manual intervention.

It is strongly recommended to use the standard codes proposed above. In any case, where bilateral agreements covering the use of codes in this field are in effect, the code must conform to the structured format of this field.

The code INS may be repeated to specify all previously involved financial institutions in the transaction chain .

Instructing institutions should be indicated in the order in which they were involved in the transaction chain, that is, the first occurrence specifies the financial institution that received the instruction from the ordering institution and passed it on to the next institution in the transaction

chain; the last occurrence always indicates the institution that instructed the sender of this message to execute the transaction.

If codes INS or ACC are present in field 72 of a received message, then these codes and the related details must be passed, unchanged, in field 72 of the subsequent message in the payment chain. Additional codes and details may be added to field 72 of the subsequent message but the original INS and ACC and related details must not be altered or removed.

22. Field 77B: Regulatory Reporting

FORMAT

Option B 3*35x (Narrative)

In addition to narrative text, the following line formats may be used:

Line 1	/8a/2!a[/additional information]	(Code)(Country Code)(Narrative)
Lines 2-3	[//continuation of additional information]	(Narrative)

BENEFRES	Residence of the beneficiary customer.
ORDERRES	Residence of the ordering customer.

USAGE RULES

Country Code consists of the ISO country code of the country of residence of the ordering customer or beneficiary customer.

The information specified must not have been explicitly conveyed in another field.

23. Field 77T: Envelope Contents

UED1	UN-EDIFACT	The content of the field is in the UN-EDIFACT format. The information will start with the UNH-segment, which contains all necessary information to process the rest of the field.

USAGE RULES

This field may contain any character defined in the 'z' character set. The 'z' character set contains the characters of both the 'x' and 'y' character set extended with the characters {, @, _ and #:

a b c d e f g h i j k l m n o p q r s t u v w x y z

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

0 1 2 3 4 5 6 7 8 9

It is highly recommended to take great care when using the character string 'CrLf', since these characters are used by the network to indicate an end of field or subfield.

The characters in the table below are not part of the z-character set on the SWIFT FIN network. Therefore, SWIFT recommends the use of the hexadecimal EBCDIC code for each character, preceded by two question marks (??) as an escape sequence. Use of this coding method must be bilaterally agreed.

MT 103 STP Single Customer Credit Transfer

The MT 103 STP is a general use message, that is, no registration in a Message User Group is necessary to send and receive this message. It allows the exchange of single customer credit transfers using a restricted set of fields and format options of the core MT 103 to make it straight through processable. The MT 103 STP is a compatible subset of the core MT 103 that is documented separately.

The differences with the core MT 103 are:

- appropriate MT 103 STP format validation is triggered by the code STP in the validation flag field 119 ({3:{119: STP}}) of the user header of the message (block 3)
- fields 52, 54, 55, 56 and 57 may only be used with letter option A
- field 53 may only be used with letter options A and B
- field 51A is not used in MT 103 STP. This message may only be used on the FIN SWIFT network since it requires special validation
- field 23E may only contain codes CORT, INTC, SDVA and REPA
- if field 53a is used with option B, Party Identifier must be used
- subfield 1 (Account) of field 59a is always mandatory
- field 72, code INS must be followed by a valid financial institution BIC
- field 72, codes REJT/RETN must not be used
- field 72 must not include ERI information.

IMPORTANT: User header block (block 3) must be present and must contain field 119 Validation Flag, with code STP, and field 121 Unique End-to-end Transaction Reference (UETR). In cases where the sender is acting as intermediary and a UETR was present in the received message, the UETR must be passed, unchanged, to the next message in the transaction chain. In all other cases, a new UETR must be used. Details of the format of the user header block and field 121, and also the required order of fields in the user header block, can be found in the FIN Operations Guide.

MT 103 STP Scope

This message type is sent by, or on behalf of, the financial institution of the ordering customer, directly or through (a) correspondent(s), to the financial institution of the beneficiary customer.

It is used to convey a funds transfer instruction in which the ordering customer or the beneficiary customer, or both, are non-financial institutions from the perspective of the Sender.

This message may only be used for clean payment instructions. It must not be used to advise the remitting bank of a payment for a clean, for example, cheque, collection, nor to provide the cover for a transaction whose completion was advised separately, for example, via an MT 400.

MT 103 STP Usage Rules

When the cover method is used for a customer credit transfer, the originating bank must:

- copy the content of field 20 of the MT 103 STP unchanged into field 21 of the related MT 202 COV;
- copy the content of field 121, in the user header block, of the MT 103 STP unchanged into field 121, in the user header block, of the related MT 202 COV.
- [When the receiver of an MT 103 STP either credits the account of the beneficiary customer or rejects the payment, a confirmation to Tracker \(TRCKCHZZ\) is mandatory. Business rules and technical specifications of the confirmation are available on the Knowledge Centre > Products A-Z > FIN > Universal Confirmations for MT 103 Rulebook.](#)

Usage Rules for Amount Related Fields

There is a relationship between the amount related fields 33B, 36, 71G, 71F and 32A which may be logically expressed in the following formula:

- The instructed amount in field 33B, adjusted with the exchange rate in field 36, plus the Receiver's charges in field 71G, minus the Sender's charges in field(s) 71F, equals the interbank settled amount in field 32A.

Presence of the fields mentioned above is subject to the conditional field rules C1, C2, C7 and C8. If a field is not present, that field must not be taken into account in the formula. If field 71F is present more than once, all occurrences of that field must be taken into account in the formula.

Examples: Transaction A

- Pay the equivalent of EUR 1000,00 in GBP to a beneficiary in the United Kingdom
- Exchange rate is 1 EUR for 0,61999 GBP
- Transaction charges on the Sender's side are EUR 5,00 (=GBP 3,1)
- Transaction charges on the Receiver's side are GBP 4 (=EUR 6,45)

Example A1: Charging option is OUR

MT 103 STP Market Practice Rules

As indicated in the MT 103 STP Guidelines, when an MT 103 STP is sent using the cover method, an MT 202 COV message must be sent to cover the transfer. A credit to a beneficiary's account that is based on the receipt of an MT 103, without receipt of the related cover payment, is a policy decision. Institutions have deployed processes that are approved by their internal risk committees; the risk lies clearly with the beneficiary institution. Guidelines for the processing of an MT 103 STP sent with the cover method have been published by the Payments Market Practice Group (PMPG).

For more details, see the market practice document *Guidelines for use of the MT 202 COV* on www.pmpg.info.

MT 103 STP Guidelines

- If the Sender and the Receiver wish to use their direct account relationship in the currency of the transfer, then the MT 103 STP message will contain the cover for the customer transfer as well as the payment details.
- If the Sender and the Receiver have no direct account relationship in the currency of the transfer or do not wish to use their account relationship, then third banks will be involved to cover the transaction. The MT 103 STP contains only the payment details and the Sender must cover the customer transfer by sending an MT 202 COV General Financial Institution Transfer to a third bank. This payment method is called 'cover'.
- Where more than two financial institutions are involved in the payment chain, and if the MT 103 STP is sent from one financial institution to the next financial institution in this chain, then the payment method is called 'serial'.
- In order to allow better reconciliation by the beneficiary customer, the MT 103 STP supports full charges transparency and structured remittance information.
- In order to allow better reconciliation by the Receiver, the MT 103 STP gives an unambiguous indication of the interbank amount booked by the Sender/to be booked by the Receiver.
- The MT 103 STP gives the Sender the ability to identify in the message the level of service requested, that is, what service is expected from the Receiver for a particular payment, for example, SWIFTPay, Standard or Priority or any other bilaterally agreed service.
- The message also allows for the inclusion of regulatory information in countries where regulatory reporting is requested.

USAGE RULES

Absence of this field implies that there is a unique account relationship between the Sender and the Receiver or that the bilaterally agreed account is to be used for settlement.

In those cases where there are multiple direct account relationships, in the currency of the transaction, between the Sender and the Receiver, and one of these accounts is to be used for reimbursement, the account to be credited or debited must be indicated in field 53B with the party identifier only.

In this case, the Receiver will be paid by its branch in field 53A.

In all other cases, when field 53A is present, a cover message, that is, MT 202 COV or equivalent non-SWIFT must be sent to the financial institution identified in field 53A.

The use and interpretation of fields 53a and 54A is, in all cases, dictated by the currency of the transaction and the correspondent relationship between the Sender and Receiver relative to that currency.

	or	or
	[/8c/[additional information]]	(Code)(Narrative)

CODES

Unless bilaterally agreed otherwise between the Sender and the Receiver, the following code may be used in Code, placed between slashes ('/'):

INS	Instructing institution	The instructing institution which instructed the Sender to execute the transaction.
-----	-------------------------	---

NETWORK VALIDATED RULES

If the code /INS/ is used at the beginning of a line, it must be followed by a valid financial institution BIC and be the only information on that line (Error code(s): T27,T28,T29,T44,T45,T46).

If the code /INS/ is present at the beginning of a line, it must not be used again at the beginning of any other line (Error code(s): T47).

If the code /INS/ is used anywhere else than at the beginning of a line, it is treated as free text and is ignored as far as validation is concerned. In this case, there is no validation of the following BIC either.

The codes /REJT/ or /RETN/ must not be used in this field (Error code(s): T81).

This field must not include ERI (Error code(s): T82).

USAGE RULES

Field 72 must never be used for information for which another field is intended.

Each item for which a code exists must start with that code and may be completed with additional information.

Each code used must be between slashes and appear at the beginning of a line. It may be followed by additional narrative text.

Narrative text relating to a preceding code, which is continued on the next line(s), must start with a double slash '//', and, if used, must begin on a new line. Narrative text should preferably be the last information in this field.

Use of field 72 with uncoded instructions is not allowed.

It is strongly recommended to use the standard code proposed above. In any case, where bilateral agreements covering the use of codes in this field are in effect, the code must conform to the structured format of this field.

If code INS is present in field 72 of a received message, then the code and the related details must be passed, unchanged, in field 72 of the subsequent message in the payment chain. Additional codes and details may be added to field 72 of the subsequent message but the original INS and related details must not be altered or removed.

22. Field 77B: Regulatory Reporting

MT 110 Field Specifications

1. Field 20: Sender's Reference

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '//'
(Error code(s): T26).

2. Field 53a: Sender's Correspondent

FORMAT

Option A	[/1!a]/[34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option B	[/1!a]/[34x] [35x]	(Party Identifier) (Location)
Option D	[/1!a]/[34x] 4*35x	(Party Identifier) (Name and Address)

PRESENCE

Optional

DEFINITION

This field specifies the account or branch of the Sender or another bank through which the Sender will reimburse the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

The absence of fields 53a and 54a implies that the single direct account relationship between the Sender and the Receiver, in the currency of the cheques, will be used.

In those cases where there are multiple direct account relationships, in the currency of the transaction, between the Sender and the Receiver, and one of these accounts is to be used for reimbursement, the account to be credited or debited must be indicated in field 53a, using option B with the party identifier only.

If there is no direct account relationship, in the currency of the transaction, between the Sender and the Receiver (or branch of the Receiver when specified in field 54a), then field 53a must be present.

When field 53a is present and contains a branch of the Sender, the need for a cover message is dependent on the currency of the transaction, the relationship between the Sender and the Receiver and the contents of field 54a, if present.

A branch of the Receiver may appear in field 53a if the financial institution providing reimbursement is both the Sender's correspondent and a branch of the Receiver, and the Sender intends to send a cover message to the branch of the Receiver. In this case, the Receiver will be paid by its branch in field 53a.

In all other cases, when field 53a is present, a cover message, that is MT 202/203 or equivalent non-SWIFT, must be sent to the financial institution identified in field 53a.

When field 53B is used to specify a branch city name, it must always be a branch of the Sender.

The use and interpretation of fields 53a and 54a is, in all cases, dictated by the currency of the transaction and the correspondent relationship between the Sender and Receiver relative to that currency.

3. Field 54a: Receiver's Correspondent

FORMAT

Option A	[/1!a]/[34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option B	[/1!a]/[34x] [35x]	(Party Identifier) (Location)
Option D	[/1!a]/[34x] 4*35x	(Party Identifier) (Name and Address)

PRESENCE

Optional

DEFINITION

This field specifies the branch of the Receiver or another bank at which the funds will be made available to the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27,T28,T29,T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

The absence of fields 53a and 54a implies that the single direct account relationship between the Sender and the Receiver, in the currency of the cheques, will be used.

In those cases where field 54a contains a branch of the Receiver, and is not preceded by field 53a, or field 53a contains an account of the Sender serviced by the Receiver's branch, the Receiver will claim reimbursement from its branch.

If field 54a contains a branch of the Receiver and field 53a contains a branch of the Sender, the Receiver will claim reimbursement from its branch or will be paid by its branch, depending on the currency of the transfer and the relationship between the Sender and the Receiver.

In all other cases where field 54a contains a branch of the Receiver, the Receiver will be paid by its branch in field 54a.

A branch of the Sender must not appear in field 54a.

If the branch of the Sender or other financial institution specified in field 53a is also the account servicer for the Receiver, field 54a must not be present.

Field 54a containing the name of a financial institution other than the Receiver's branch must be preceded by field 53a; the Receiver will be paid by the financial institution in field 54a.

The use and interpretation of fields 53a and 54a is in all cases dictated by the currency of the transaction and the correspondent relationship between the Sender and Receiver relative to that currency.

4. Field 72: Sender to Receiver Information

FORMAT

6*35x (Narrative)

In addition to narrative text, structured text with the following formats may be used:

Line 1	/8c/[additional information]	(Code)(Narrative)

	or	or
	/8c/[additional information]]	(Code)(Narrative)

PRESENCE

Optional

INT	Intermediary institution	Instructions following are for the intermediary institution.

NETWORK VALIDATED RULES

If the first six characters in line 1 contain the character string /REJT/ or /RETN/, then it is mandatory to follow the *Payments Reject/Return Guidelines* described in the *Standards MT Usage Guidelines* (Error code(s): T80).

USAGE RULES

Field 72 must never be used for information for which another field is intended.

Use of field 72, particularly with uncoded instructions, may cause delay, because, in automated systems, the presence of this field will normally require manual intervention.

It is strongly recommended to use the standard codes proposed above. However, where bilateral agreements covering the use of codes in this field are in effect, the code must conform to the structure of this field.

Each item for which a code exists must start with that code and may be completed with additional information.

Each code used must be between slashes and appear at the beginning of a line. It may be followed by additional narrative text.

Narrative text relating to a preceding code, which is continued on the next line(s), must start with a double slash '//', and, if used, must begin on a new line. Narrative text should preferably be the last information in this field.

This field may include ERI to transport dual currencies, as specified in the chapter entitled "Euro-Related Information (ERI)" in the *Standards MT General Information*.

In order to comply with the EC-directive on cross border credit transfers, the optional code word EXCH may be used to transport an exchange rate. In line with ERI, the code word EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash.
