

GENEVA
26 - 29 Sep 2016

SWIFT at Sibos

Discover how SWIFT is making real world change

This year, the SWIFT at Sibos programme will feature in-depth coverage of SWIFT's latest products and services, particularly focused around some of our key SWIFT 2020 priorities:

- **Financial Crime Compliance** - making it harder for crime to pay
- **Reinventing Banking** - delivering the future of cross-border payments
- **Market Infrastructures** - supporting your business, connecting your community
- **Focus on the Core** - driving security and efficiency

Visit us on the SWIFT stand **G40** on the exhibition floor (Hall 5) to find out more about these four strategic areas, and to attend the daily [SWIFT Institute](#) lectures in our amphitheatre where academics from around the world share the results of their ground-breaking research.

SWIFT Auditorium PLENARY LEVEL

Come to the SWIFT Auditorium this year to discover more about SWIFT's solutions for the financial community and hear directly from financial institutions and corporates on how they use SWIFT's products and services to reduce costs and improve operational efficiency. Over the course of the week, there will be a number of sessions covering topics including banking, securities, market infrastructures, financial crime compliance, risk and cloud, delivering a comprehensive overview of the latest enhancements and future developments from SWIFT.

SWIFTLab EXHIBITION FLOOR, HALL 5

Making its return to Sibos, this time the SWIFTLab has a dedicated exhibition space between the Innoribe and SWIFT stands on the exhibition floor. Fully aligned with the SWIFT Auditorium programme, [SWIFTLab](#) allows our customers to experience and discover SWIFT's products and services firsthand with live demo sessions. It is also a great opportunity to see the ongoing R&D work being carried out by SWIFT to develop new concepts, products and business models. Visit the SWIFTLab and leverage your SWIFT knowledge by attending live demo sessions or by meeting SWIFT experts at the different pods to ask all the questions you ever wanted to ask!

Visit us on the SWIFT stand, in the SWIFT Auditorium or at the SWIFTLab to find out more about how SWIFT is developing new ways to help the financial industry to meet the challenges of tomorrow.
