Introducing Alliance Lite2

Your trusted link to SWIFT
Cloud trends

“Enterprises across all sectors, are either in the cloud, transitioning to the cloud, or thinking about making the idea of cloud a reality”* 

- Outsourcing of technical infrastructure
- Lower complexity
- Lower TCO
- Reduced implementation time

Focus on core business

*Networkworld - What to think about when moving to the Cloud – 19 Sept 2016
Multi-banking often requires many protocols, channels & processes to be used

- Lack of visibility on cash positions
- Lack of automation of trade transactions
- Manual processes & errors
- Bank- and vendor-specific processes, security tools and onboarding costs
- High operational costs
- Complicated traceability and compliance
Streamlining banking communication with multibanking technologies

Financial institution, corporate,…

BIC CORPBRBB
Alliance Lite2

Your trusted link to SWIFT
SWIFT Cloud-based connectivity enables financial institutions and corporates to exchange financial transactions with 10,800+ institutions worldwide while benefitting from the same security attributes as other SWIFT core services.

Your trusted link to the financial industry
Alliance Lite2 enables direct access to financial institutions across the globe, providing services via the SWIFT Community Cloud.

- Web user
- Manual and automated flows
- 1,500+ customers already
- One single and Direct channel to SWIFT
- No Third Party
- Rapid set-up
- Lighter footprint
- Managed and operated by SWIFT
- Worldwide 24/7 support
Introducing Alliance Lite2 - October 2017 - Public

**Alliance Lite2 overview**

**Manual operations**
- Web user interface
- User and profile management
- Payment messages creation
- Manual file upload
- Approval flows
- Statement messages reception
- Messages reports and Audit Trail

**Automated operations**
- Automated File Transfer
- Direct Link option for integration with back-office applications (MQ, WebServices, …) and transformations

Supports up to 10,000 messages sent and received per day
How does it work?

**Manual flows**

User + Token + Connection

**Automated flows**

Back Office + Autoclient or Direct Link + Channel Certificate + Connection
Alliance Lite2 Direct Link

- Provides an interactive connection between back-office and Alliance Lite2 through “fileless” flow
- Makes it easier to comply with Customer Security programme
- Offers ad-hoc integration and transformations capabilities
Easy to implement Security controls

Alliance Lite2 has a lighter footprint

- Additional configuration changes
- RMA management assistance

**Support**

Standard+ Support (Global 24*7*365)
Alliance Lite2 Pricing

- One time set up fee
- All inclusive monthly subscription fee based on usage
- Messages and files sent are charged as per standard SWIFT prices
“We decided to implement SWIFT cash reporting in our back office to further standardise and automate our treasury operations. After exploring various options, we selected Alliance Lite2 as the best way to start enjoying the benefits of SWIFT for our business. Alliance Lite2 has given us greater visibility over our cash management and helped us optimise our connections with our banking partners. It is simple and easy to use, and the Lite2 service and support from SWIFT has gotten us up and running in a matter of weeks.”

Paul Tawel, Senior Manager, Treasury Operations, Canadian National Railway Company

Canadian National Railway, Canada

Increasing back-office efficiency with Alliance Lite2

**Your challenges**

- Multiple web portals needed to manage bank accounts
- Insufficient visibility over global accounts and banking relationships
- Expensive to centralise accounts in concentrator bank
- Wanted more automation and standardisation
- Lack of experience with SWIFT standards and bank on-boarding requirements

**Our solution**

- Consulting assistance for on-boarding, message standards and best practices implementation
- Automated wire transfers over SWIFT
- Global cash overview from EOD cash statements over SWIFT
- End-to-end assistance: project management, implementation, collaborative troubleshooting
- Alliance Lite2 cloud solution means lower banking costs, greater flexibility

**Your Benefits**

- Enhanced cash management thanks to better visibility and operational efficiency
- Increased automation, standardisation and straight-through processing
- Lower costs by diversifying banking connections
- Greater flexibility and control over the banking relations

Alliance Lite2 – Introduction – June 2017
Our ambition was to raise our Pension Fund operations infrastructure to the level of excellence that characterises CERN’s scientific and engineering activities. In a very short period of time, Alliance Lite2 has enabled us to do just that. Alliance Lite2 provides a cloud solution for connecting our Trading application service provider with the global SWIFT community of brokers and liquidity destinations – without the need for large upfront capital costs.”
Nicolas Salomon, Head of Middle Office/Treasury, CERN

CERN Pension Fund, Switzerland
Reducing operational costs with Alliance Lite2

You challenges
- 4 billion CHF pension fund dealing with 21 currencies
- High transaction costs for overall trading activities
- Limited access to larger trading network, leading to high broker costs
- Need to increase STP rates for pension operations
- Inability to connect to the business application via Service Bureau

Our solution
- Global integration of SWIFT flows with TradingScreen (application provider) solution, enabling STP of foreign exchange trades
- Clear migration roadmap and project management from SWIFT, minimising operational impact for CERN
- Alliance Lite2 cloud solution means no SWIFT infrastructure to maintain (strategic move from capital expenditure to operational expenditure)

You benefits
- Achieved objectives to rationalise trading flow
- Full integration between Alliance Lite2, CERN and TradingScreen (business application provider)
- One trusted provider to deal with (SWIFT), enabling access to global financial network
- Efficiencies from central operations leading to economies of scale and lower operational costs
