For sustainable success in a fast-changing world.

Context

Businesses across the world are increasingly grasping the multiple benefits of using cloud-hosted platforms and services. For some, the increased flexibility and scalability from making the most of top-tier tools is fundamental to achieving greater agility in a fast-evolving, unpredictable business environment.

For others, the value of cloud-based service provision lies in the lower operational risks and costs of hosting, maintaining and upgrading core infrastructure components in a secure and resilient environment.

Benefits

Universal access to SWIFT

Future proofing

Managed operations against lower costs

Superior user experience

Operational excellence

High performance, 24/7 availability

Alliance Cloud is the new, unified, cloud-based connection channel to SWIFT's full suite of services, alongside 11,000 member banks, market infrastructure providers, securities firms and corporates. It will support your business' future growth strategy, whilst also providing high levels of operational excellence and low total cost of ownership.

Universal access to SWIFT

As a trusted leader in global secure financial messaging services, we connect more than 11,000 banking and securities organisations, market infrastructures and corporate customers in more than 200 countries and territories. As a fully managed and secure service, Alliance Cloud delivers consistent and secure access to all these entities and SWIFT services, and supports global initiatives now and into the future.

Future proofing

With Alliance Cloud connectivity, you can scale in line with your growing business needs, without incurring burdensome operational overheads. Further, you can quickly take advantage of new services, integrate new initiatives – both from SWIFT and across the industry – and adopt new evolutions in API technologies.

Managed operations against lower costs

Alliance Cloud, fully managed and hosted by SWIFT, minimises use of internal infrastructure and resources, guaranteeing a highly cost effective setting.

Superior user experience

Alliance Cloud comes with a top-notch user interface, which guarantees an intuitive and consistent user experience across all SWIFT services.
The customer is fully autonomous in terms of message processing, as the workflows are self-configurable. "Rich features" such as message tagging enable accelerated routing and investigation. Furthermore, the workflows are integrated with SWIFT services such as gpi and sanctions screening.

Operational excellence

Alliance Cloud delivers a connectivity channel that meets the highest operational standards. With unparalleled experience and expertise, we ensure optimal levels of availability, resilience and security whilst also reducing the customer's local risk perimeter. Alliance's robust cloud platform underpins client services through multi-tenant workspace, agile development and deployment, and an integration framework to deliver API access to multiple SWIFT services.

High performance, 24/7 availability

Our advanced cloud-native technology and processing power enable Alliance Cloud to handle high volumes and complex messaging needs from the more sophisticated and demanding users with 24/7 cloud service availability.

"Alongside our existing offerings of both cloud-based and on-premise interfaces, Alliance Cloud is taking a significant step forward in how we bring the benefits of the cloud to our larger community."

SWIFT is a member-owned cooperative, providing secure financial messaging services to more than 11,000 organisations, across the financial ecosystem, in almost every country in the world. For nearly five decades we have delivered certainty, continuity and excellence by constantly evolving in an everchanging landscape. In today's fast moving, increasingly connected and challenging world, this approach has never been more relevant.
