Leveraging your SWIFT infrastructure for T2S

Let SWIFT get you connected to TARGET2-Securities (T2S) with the minimal cost and risk – so you can concentrate on your business

SWIFT's Valued-added Network (VAN) Solution for T2S

Following a competitive tender, SWIFT has been awarded a licence to provide connectivity services to TARGET2-Securities (T2S). We are currently engaged in delivering SWIFT's VAN Solution for T2S, allowing for the secure exchange of information in ISO 20022 formats between T2S participants and the T2S platform.

SWIFT's VAN Solution for T2S will offer our hallmark world-class reliability, availability and business continuity – all at attractive pricing and with a minimal upfront cost.

We complement our offering with optional products and services to allow for a complete SWIFT-based T2S connectivity solution, including the integration layer with your back-office application.

We are leveraging our vast experience with securities market infrastructures and major technology platform migrations, as well as our unrivalled technical and business standards expertise, to provide services and products that will support you from the analysis stage, through implementation, testing and migration, all the way to live operations.

T2S: crucial to harmonisation in Europe

The objective of T2S is to facilitate post-trading integration by offering core, neutral, harmonised and commoditised delivery-versus-payment settlement in central bank money in substantially all securities in Europe. This will ensure efficient and sound clearing and payment systems and support the Lisbon agenda in securities markets.

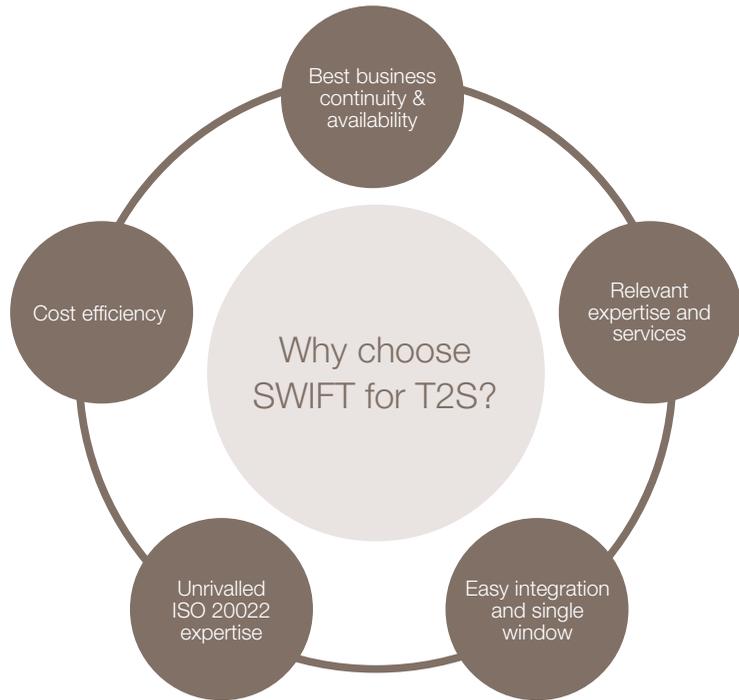

SWIFT has a strategic commitment to support European harmonisation efforts – so we are a natural strategic partner for you as you embark upon your T2S project.

SWIFT is already the de facto provider for connectivity and interoperability services in the European clearing and settlement environment. The SWIFT single window means that if you are already on SWIFT, you don't have to make significant changes to connect to T2S.

Let SWIFT help you achieve an easy, smooth transition to T2S – leaving you free to concentrate on your business strategy for success in the new environment.

Why choose SWIFT for T2S?

- Leverage to a maximum your existing SWIFT footprint and your investment and expertise in SWIFT. Take advantage of your inhouse knowledge of SWIFT, and extract more out of your prior investments in SWIFT, to connect to T2S with the least effort, risk and cost.
- Benefit from attractive pricing for T2S connectivity. SWIFT's maximum pricing for T2S is the most economical. Low and transparent pricing, coupled with the benefits of leveraging your existing infrastructure, make SWIFT a highly cost-effective option for T2S.
- Leverage the connectivity solution with the widest reach and the highest resilience. SWIFT's community encompasses more than 210 countries. Our hallmark is world-class (99.999%) reliability, availability and business continuity. Our multi-vendor approach guarantees better resilience than the alternatives. T2S will be a critical infrastructure, and SWIFT's is the most reliable connectivity solution via which to access it.

.....
“SWIFT is already the de facto provider for connectivity and interoperability services in the European clearing and settlement environment. If you are already on SWIFT, you don’t have to make significant changes to connect to T2S”

- Partner with the provider that has the most strategic commitment to supporting harmonisation in Europe. For SWIFT, supporting improvements in efficiency in European clearing and settlement is a key plank of our current strategy. We can help you prepare technically and strategically for the new environment, so you can capitalise on the opportunities it will bring.

As the de facto provider for connectivity and interoperability services in European clearing and settlement, we are your natural partner. We can get you connected to T2S with the lowest risk and cost – via your SWIFT single window.

- Capitalise on our end-to-end services for T2S – available now. SWIFT has an unrivalled track record of managing technical platform migrations and significant expertise in securities market infrastructure initiatives. We also have unbeatable expertise in the ISO 20022 standards underpinning T2S communications. Based on this we can offer end-to-end managed services to support every aspect of your T2S project, starting from the analysis stage, and progressing through implementation, testing and migration, all the way to live operations.

SWIFT also offers services to help you manage your customer community readiness. These include training, message impact assessments, standards documentation.
