

BELLIN SWIFT Service

BELLIN SWIFT Service: the powerful SWIFT network at your fingertips

The integrated BELLIN SWIFT Service gives your company access to the SWIFT global communication network. Companies receive their own corporate SWIFT BIC and become a member of SWIFT's Standardised Corporate Environment (SCORE).

BELLIN SWIFT Service: multiple ways to leverage the network

The BELLIN SWIFT Service enables you to use the SWIFT network to retrieve account statements, make payments using tm5's integrated multi-bank platform and optimize trade finance.

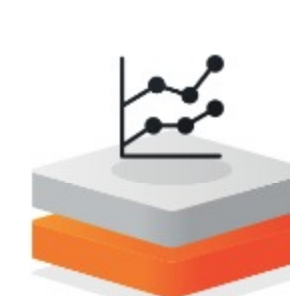

Cash management

- Receive worldwide account statements
- Bank-agnostic
- Standardized file formats
- Real-time, group-wide financial status

Payments

- Global banking network
- Direct banking communication
- Numerous formats via one channel
- Tracking of cross-border payments
- Global single and bulk payments

Digital matching and trade finance

- Digital exchange of confirmations
- Digital processing of letters of credit
- Digital opening of guarantees

"The BELLIN SWIFT Service has given us the perfect response to our bank connectivity challenges – it has ensured efficiency, standardization, control and security."

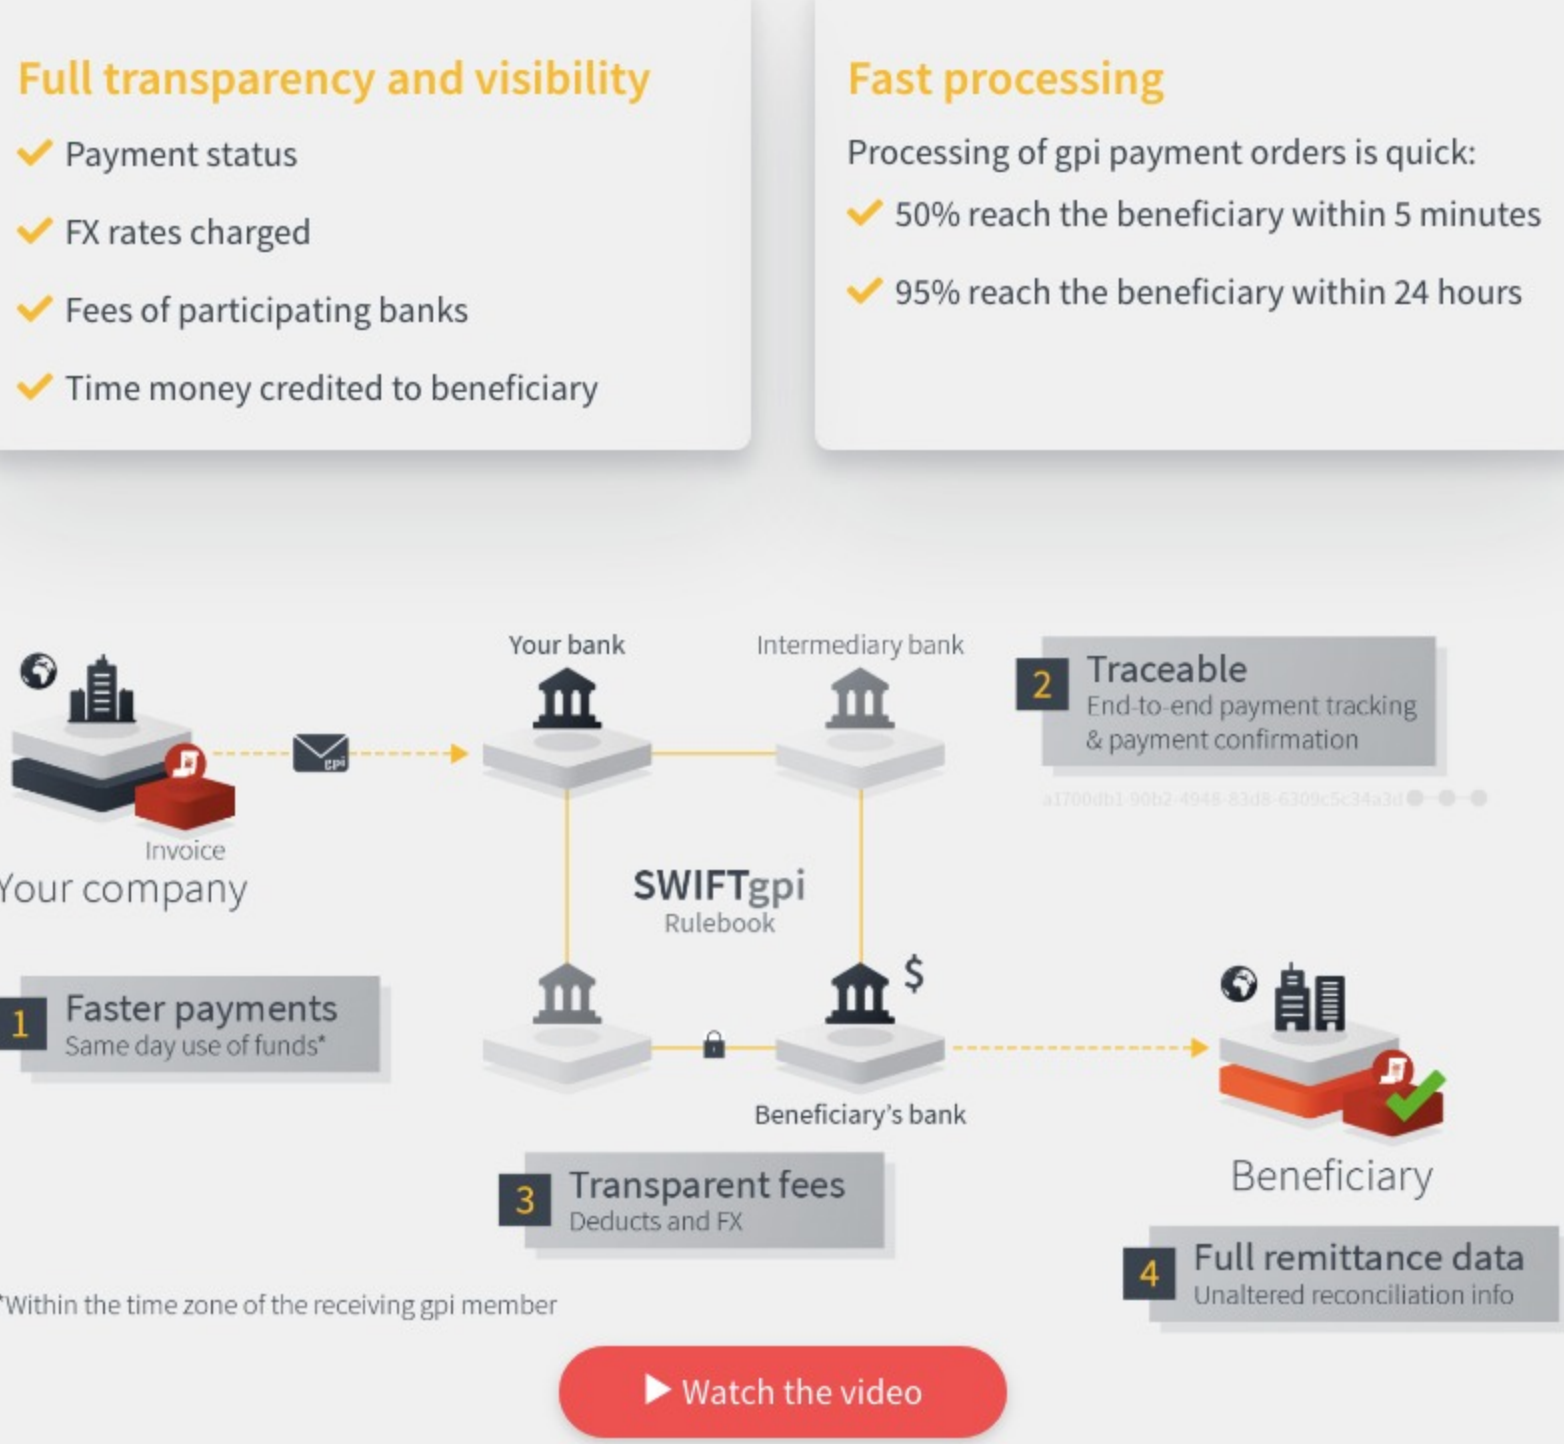

Hien Dijkstra
Treasurer, Darling Ingredients International

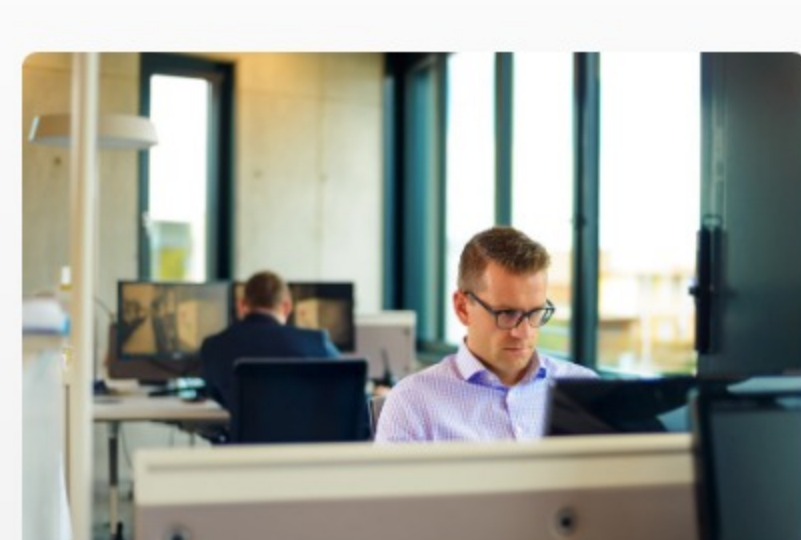

SWIFT gpi for Corporates (g4C): initiate gpi payments directly in tm5

BELLIN has fully integrated SWIFT's g4C technology. This means that you can initiate gpi payments directly in your treasury management system. The BELLIN system generates the SWIFT reference (UETR) for fast, transparent and traceable gpi payments.

You receive a message as soon as the status of the payment changes.

CSP Package: increased security, assessment included

To protect the SWIFT network and all of its members, SWIFT requires everyone to adopt strict safeguards as part of its Customer Security Programme (CSP). These safeguards are checked annually and from 2021 must also be approved by an external auditor.

BELLIN has put together a CSP Package for BELLIN SWIFT Service customers which provides assistance checking that SWIFT security requirements are met, increases the level of security at the company and enables CSP self-attestation to be carried out with minimal effort.

As part of the CSP Package, we also retain and manage customers' SWIFT tokens on their behalf.
