PUT

APIs supported for	gpi customer credit transfers
	gpi cover payments
	gpi stop and recall service
	Universal Confirmations
	gpi pay and trace
	gpi financial institution transfers
	gpi instant payments
APIs Version supported	Version 2
	Version 3

Geographical reach (number of participants)

Region	Sales staff	Support staff	Customers
North America			
Latin America			
Northern Europe			
Southern Europe			
Middle-East&Africa			
Asia Pacific			

Committed to Support gpi Roadmap (M*)

Support Universal confirmation for all customers in all application releases as part of the annual standards release

Application Dependencies

Application has inbuilt beneficiary account ledger module to credit and debit account balances**

Application need integration with such account ledger module in third party systems (eg: core back office systems)

Integration options available in the application

MQ	APIs	sFTP	OTHER

Reference Customers

Institution	Customer Contact		
	Name of the reference customers for customer attestation.		
	Name		**email**
	Name		**email**
	Name		**email**
	Name		**email**

M* - Mandatory support required for accepting an application as gpi ready

** Having first hand information within the application around the beneficiary account ledger makes sure that the application has visibility as to when the final beneficiary was credited to provide the date and time visibility in a credit confirmation.

*** Refer to the gpi Reject Reason Code Master list in the gpi rulebook for mandatory services

**** wherever applicable based on the official rulebooks for the specific services
