# Monte Titoli

ISO Standards specifications review and documentation

Your Challenges

- Review of ISO 15022 specifications currently in use to ensure compatibility with T2S functionalities and compliance with global best practices
- Need to define and publish target ISO15022 and 20022 message specifications for indirectly connected customers within a strict timeline
- Corporate Actions process and message review to ensure compliance with market practices, alignment between internal systems and implementation of new Corporate Events

Our Solution

- ISO 15022 settlement and Corporate Actions message review
- Identification of message element/type gaps in relation to required T2S functionalities
- Market practice conformance review of the whole set of messages across supported events and throughout the different event lifecycle stages
- Conversion of target ISO 15022 message specifications into their ISO 20022 equivalents

Your Benefits

- Accelerate the message Standards analysis phase
- Leverage proven standards expertise
- Improve quality of specifications and ensure compliance with global market practice
- Support and transfer of intelligence required to map 15022 into 20022 message specifications
- Introduction to the use of the MyStandards platform
