## Watch Analytics - Enhancements

Based on feedback received during the BI User Group meetings, we have the pleasure to announce that the following features will be available as of mid February 2018:

- **Report subscriptions:** This new feature allows you to subscribe to specific report templates. Depending on your preferences, it will inform you on a monthly or daily basis via e-mail when the data of the previous month/day has been added to the report. The e-mail will also include a link allowing you to open the report directly, once logged into the tool.

*How to subscribe to a report?*

From a report, click '**Report home**' on the top banner, select '**Subscribe to**' and then '**History list**'.

The screenshot shows a dialog box titled "Subscribe to History List". It contains the following elements:

- A status bar at the top: "You have 0 subscriptions to this report."
- A section titled "History List Subscription" with the following fields:
  - Name: "Your report name" (text input)
  - Report: "FIN Traffic Analytics - Wizard" (text input)
  - Schedule: "Watch Analytics - Monthly Data Load" (dropdown menu, circled in red)
  - To: "Your name" (text input with a lock icon)
  - Checkbox: "Run subscription immediately" (unchecked)
  - Section: "Advanced Options" (collapsed)
- A section titled "Delivery Notification" with a checkbox: "Send notification to email address:" (checked, circled in red)
- Buttons: "OK" and "Cancel" at the bottom right.

From this screen you can select the following:

- The schedule (monthly or daily) that you want the data to be added to your report. If you select monthly data load, it means the data of the previous month will be added automatically to your report once the data has been published into the tool. The option 'Every day' is only applicable for Banking Analytics Premium users that have access to daily data.
  - By selecting the option 'Send notification to email address' you will receive the link to the report on a monthly/daily basis when the data of the previous month/day is loaded.
- **NAK reason:** A new attribute, NAK reason, has been added to the Traffic Analytics wizards and will give you more information about why your messages were NAKed.

## Watch Banking Insights – Enhancements + webinar invite

- **New metrics in the Cash & Payments and Trade Finance dashboards**

Following up on customer requirements, we have added **SWIFT Totals** by counterparty country in the Cash & Payments and Trade Finance dashboards 'Activity share' tab.

- **New panels in the Network Management dashboard**

Two new panels (sent/received) have been added to the 'Correspondent' tab to help you easily identify your top counterparty countries and correspondents for transactions/amounts sent/received in a specific currency.

- **Improved User Experience**

The three dashboards recently went through a complete UX review.

Some of the changes include:

- Improved chart titles to get a good understanding of what data is presented
- The dataset used in the heatmap/worldmap has also been made available in table format
- In 'Overview' tabs, we have added the actual figures on top of growth percentage

To learn more about these enhancements, please join one of the following webinars:

- **Tuesday, 6 March 2018**, 9:30-10:00 CET – Click to register [here](#)
- **Thursday, 8 March 2018**, 16:00-16:30 CET – Click to register [here](#)

## RMB Tracker – Special edition

*RMB internationalisation: Where we are and what we can expect in 2018*

*Digital usage on services such as SWIFT gpi sets the stage for improved RMB growth*

SWIFT's latest RMB Tracker reveals a mixed year for the Chinese currency's growth in 2017 and identifies some of the critical factors for success in 2018.

To continue reading, [click here](#). To access the full report, [click here](#).

The SWIFT RMB Tracker provides key statistics to understand the progress made in China's Renminbi (RMB) towards becoming an international currency.

To gain more insight on RMB, [subscribe](#) to SWIFT's free Monthly RMB Tracker and consult past [RMB Trackers](#).

In addition to the RMB Tracker, we offer RMB Market Insights. This quarterly report is designed as a means to track in detail and follow the growth of RMB and its impact on the financial industry as a whole. The report helps identify the top currencies, including their growth across various markets, as well as primary countries using RMB across all these markets.
