Category 7 – Guarantees and Standby LCs
Changes after advance information

This document lists the changes to the interbank messages (760-787) after the publication of the Advance Documentation of 23rd February 2018

Important notes

- The Standards Release Guide for 2019, published in December 2018, contains the approved version of the MTs 760 – 787 and replaces previous documents.

- Editorial updates are not listed.

Changes since 23rd February 2018 Advance Documentation

Changes to the messages, since the previous edition of advance information, are as follows:

MTs	Updates
760, 765, 767, 785	Reuse in sequence B field 59a (no letter option, existing option A) instead of creating option D and changing option A
MT 760	Field 23X moved from sequence B to sequence A
	Renamed field 44H in sequence B and C + definition change
	Add network validated rule for field 44H in sequence B and C
	Merge NVR C6 and C11 into 1 rule (to be consistent with other rules, like C1). Rule is the same, only reference to another sequence, same error code: C19
MT 765	Field 21 definition updated
MT 767	Added 2 fields in sequence B and sequence C (24E and 24G)
	Added network validated rule (C4)
	Field 23X moved from sequence B to sequence A
MT 768	Codes and usage rules deleted from field 72Z
MT 785	Field 52a definition updated
MT 786	Scope updated
	Field 52a definition updated
MT 787	Field 52a definition updated
