

SWIFTRef

The global reference data utility

Your single source of reference data

In today's global financial landscape, having a proper data management strategy is a must. Financial institutions, corporates and financial services providers need a reference data partner they can rely on to give them the peace of mind that they're in safe hands.

The reference data reality

As a participant in the financial world, there's a lot of pressure to offer the best level of service to your customers, keep an excellent reputation, all whilst reducing costs.

Achieving operational excellence is therefore an objective in both your financial and compliance activities. Access to accurate reference data is paramount.

However, collecting and maintaining reference data on an individual basis can be challenging. As well as collecting data from multiple sources, you also need to clean, validate, cross-reference and maintain the data. This is where a reference data provider can help.

Optimising your business processes

Achieve objectives

Institutions working with a reference data provider are typically striving to meet a number of key business objectives:

- Reduce costs associated with heavy manual processes
- Prevent costly and time-wasting errors
- Improve operational efficiency by integrating trustworthy data
- Get consistent data to centralise data management functions

Manage risks

Inaccurate reference data management policies can cause a myriad of issues:

- Operational failures deriving from imprecise reference data create critical delays to payments or deliveries
- Lacking a standardised, accurate reference data management approach leads to potential non-compliance with regulators
- Manual reference data management processes may lead to human driven fraud
- The risks of failure come at a high cost including reputational damage, and increased business and compliance threats

Expect the best

Reputation is everything. Working with a trustworthy reference data provider is essential, giving you peace of mind that their solution can:

- Deliver accurate data to meet your needs
- Maintain relevant and recent data
- Guarantee the integrity of the source of their data
- Discover new data and future-proof your data requirements
- Validate, cleanse, cross-reference and standardise data
- Provide quality data collection, management and processing solutions

Discover SWIFTRef

SWIFTRef is SWIFT's unique reference data and financial information service. It is based on the same high levels of security, resilience and support as the SWIFT network.

Thanks to its industry role, SWIFT is uniquely placed to collect reference data from data originators and financial community members. And as the ISO Registry for BIC and IBAN formats and the prime issuer of LEIs, SWIFT is itself a key originator of reference data.

Sourced exclusively from authorised data owners, SWIFTRef includes the most accurate available data.

It offers financial institutions, corporates and financial services providers a single and unique source of reference data and financial information. This helps facilitate flawless payments processing and accurate regulatory compliance, counterparty risk analysis and due diligence.

SWIFTRef for payments processing

Your business relies on accurate and up-to-date reference data to feed your payments and other financial transactions, helping you achieve operational efficiency.

Whether you are a financial institution or a corporate, for payments professionals collecting accurate reference data from many sources, standardising it and maintaining it remains a significant challenge. This is particularly the case if you are operating on a global scale.

With SWIFTRef data, your payment systems will be able to easily validate payment instructions and select appropriate routing for messages. This allows you to optimise automation and achieve higher straight-through processing rates. The number of payments requiring repair and investigation will drastically reduce, improving the efficiency of your back office, driving down costs and reducing operational risk.

Bank Identifiers

The dynamic payments landscape sees many business reorganisations, mergers and acquisitions, which cause bank details to change frequently. SWIFTRef provides you with the most accurate and up-to-date bank identifiers and attributes that you will need for both your domestic and cross-border payments.

Payments systems and market infrastructures membership

Each payment system or market infrastructure has its own membership list and setup including specific members' identifiers, routing data, format and structure. SWIFTRef provides you with the normalised view of financial institutions' membership to clearing systems, market infrastructures and SWIFTNet services, ensuring the fastest route to your payment's end destination.

Standing Settlement Instructions

You may need to process thousands of cross-border retail and/or FX and money market-related wholesale payments each day. Access to accurate and up-to-date Standing Settlement Instructions (SSI) is critical. It will ensure a fast and accurate cross-border payments process, help reduce settlement risk and improve your straight-through processing (STP) rates. SWIFTRef provides you with SSI information sourced from the institutions themselves and from the SSI broadcasts shared on the SWIFT network. With our collaborative structure, you can easily update your own SSI information if needed.

SWIFTRef for payments and transactions processing

- All SWIFT BIC Codes
- Legal Entity Identifiers (LEIs)
- National clearing/sort codes (200+ countries) incl. CHIPS + local language codes
- Clearing & Settlement Mechanisms membership, incl. EBA, TARGET, CIPS, India
- Operational & legal name and addresses
- BIC/IBAN/SEPA data
- Account Structure information
- SWIFT Connectivity Information (FIN, IA, FA)
- Bank Standing Settlement Instructions (SSIs)
- Time-zone information
- Country and currency ISO codes and bank holidays
- Bank Hierarchy Information (BIC Hierarchy)
- SWIFTNET Services info
- Broadcast messages

SWIFTRef for regulatory compliance, risk management and due diligence

Increasing demands by regulators for transparency and lower risk mean you need to choose your business partners more carefully than ever.

Having accurate entity data will help you select the entities you want to do business with and maintain visibility of their financial health.

However, it is a challenge to collect and maintain accurate entity data on prospective and existing counterparties. The variety of sources means it's hard to build a single entity database to assess opportunities, risks and comply with regulations.

With SWIFTRef data, you will be able to run thorough preliminary entity assessments, thanks to our standardised approach, our in depth data collection and maintenance processes, and our recognised matching capabilities.

Cross-referenced Entity Identifiers

Since the last financial crisis, it became clear there was a need for identifying entities and understanding your exposure to counterparties better. Whether it's an LEI, BIC or GIIN, in this complex environment, there's a critical need to identify counterparties with the relevant identifiers. However, it's a major challenge to get a centralised view on all entities. Whether it is for entity assessment purposes or for regulatory reporting, SWIFTRef provides you with a consistent, standardised view on entities and their different identifiers, thanks to a certified matching capability we put in place.

Legal Ownership Structure

When assessing the risks of opening a new business relationship, it's important to see the bigger picture, including the health and activities of that entity's full legal group. Some regulations such as Dodd Frank, KYC or CSDR also require visibility on legal ownership structure of groups. Permanently changing, this information is particularly difficult to collect and maintain. Our dedicated SWIFTRef data team provides you with the legal ownership structure of financial institutions, including direct and ultimate legal parent, even for branches.

Financial Data

High-quality financial data on entities is critical in saving time, gaining efficiency and protecting your businesses. SWIFTRef centrally provides you with information such as bank financials, credit ratings, executives and directors information, and industry classifications from recognised providers including Moody's and Dun & Bradstreet.

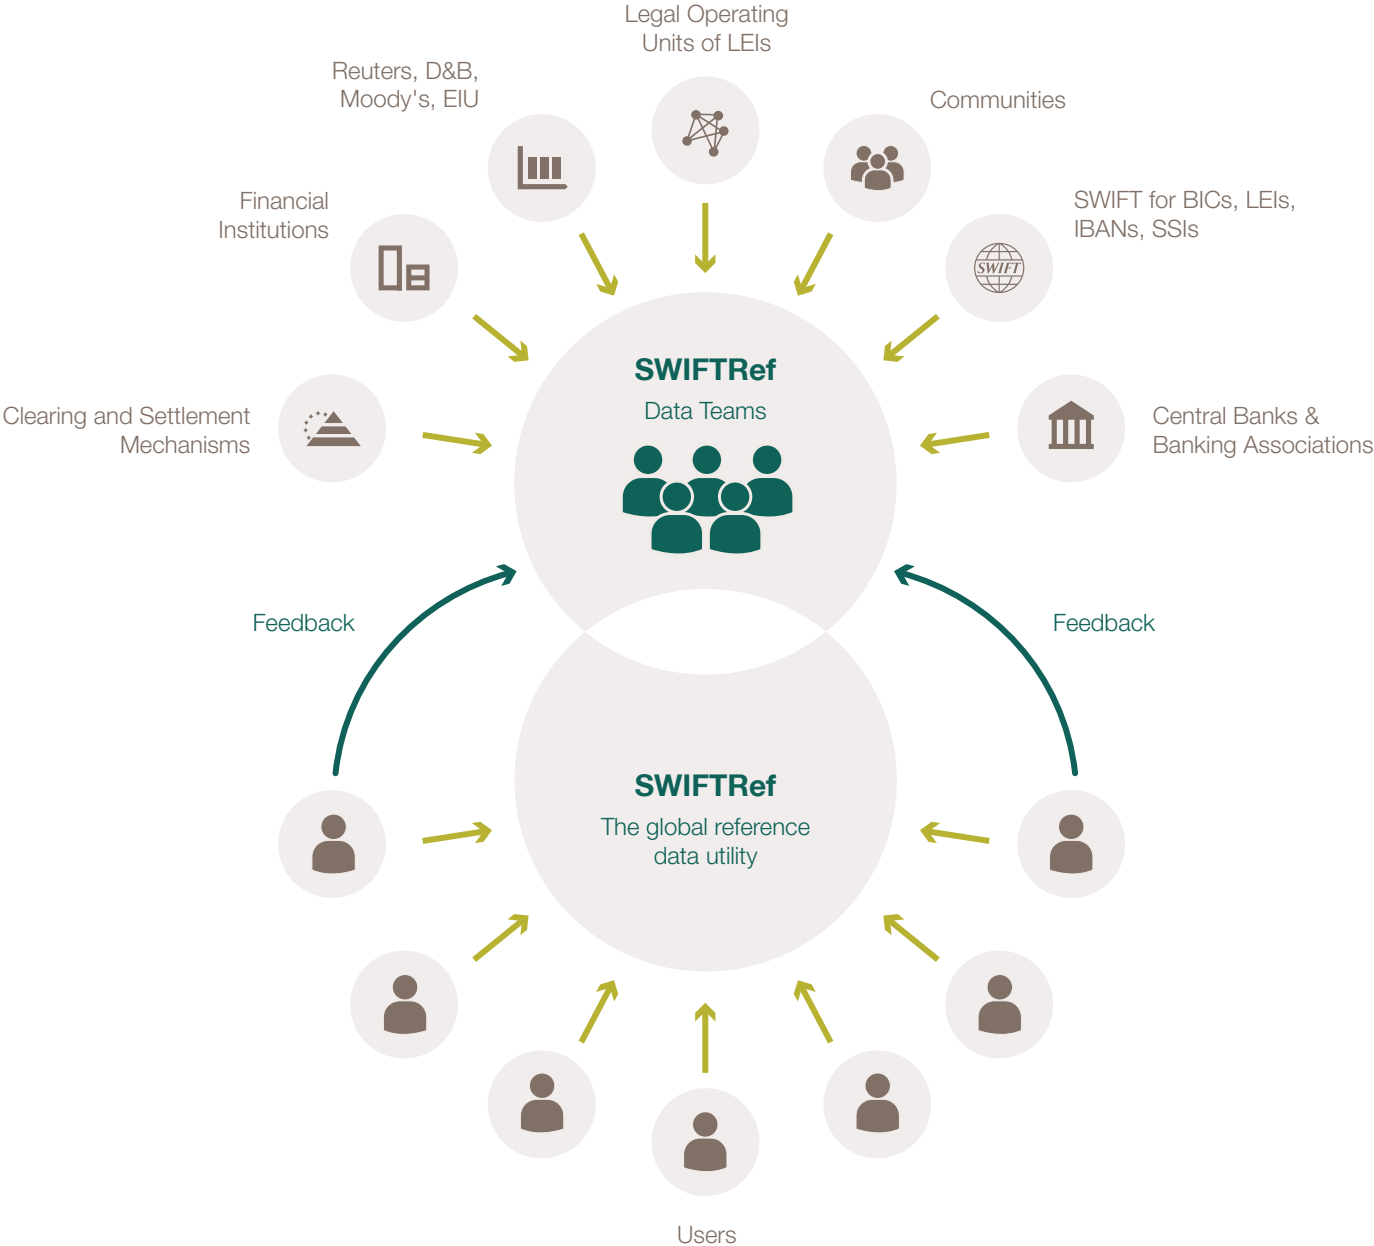

Direct link to the KYC Registry

SWIFTRef data includes a direct link to SWIFT's KYC Registry to ease your KYC processes.

SWIFTRef for regulatory compliance, risk management and due diligence

- Cross-referenced SWIFT BIC Codes, Legal Entity Identifiers (LEIs), Global Intermediary Identification Numbers (GIINs), Market Identifier Codes (MICs), Business Registration Numbers (BRNs)
- Legal Entity Ownership Structure
- Legal name and address, Legal Type, Business Type
- Credit Ratings
- Shareholding activity
- Entity News
- Executive/Management Information
- Tax Information
- Financials

Quality data at your fingertips

Why SWIFTRef?

The SWIFTRef utility is built on a highly-secure platform, sourcing and maintaining data based on a unique collaborative approach, and strict data collection and maintenance procedures. Access data in near real-time via dedicated software, and with SWIFT's best-in-class support services to help you get started.

High quality reference data

SWIFTRef sources data solely from authorised data originators to ensure the highest data quality expected by our end-users. A dedicated data collection team constantly researches and improves data quality while ensuring direct follow-up with originators when investigation requests are introduced for missing or incorrect data.

Always up-to-date

In a typical month, approximately 1,400 BICs undergo one or more changes, national clearing codes of more than 190 countries and territories are updated and approximately 15,000 SSIs change. About 15,000 new LEIs and 1,500 new GIIN codes are also added. With this in mind, maintaining accurate and up-to-date global reference data is a major challenge for organisations.

Thanks to our unique collaborative approach and easy-to-use maintenance tools, SWIFTRef can also rely on its data owners to maintain their data in the SWIFTRef utility on a daily basis. This way, SWIFTRef offers you the highest levels of data accuracy.

Broad range of delivery channels

You can choose from our extensive range of data formats and delivery channels: online lookup service, flat files (in txt or xml) – manually or automatically downloadable (web services) or delivered over FileAct, and SWIFTRef APIs.

To best support your ERP requirements and needs, directories are available in SAPTM and ERP compatible formats.

Dedicated software

To help you better manage your reference data (including from different sources), SWIFTRef provides dedicated software, SWIFTRef Data Manager, to help you manage, merge and build data files to meet your specific needs.

First class service and support

A multi-lingual helpdesk is available for your day-to-day data queries.

Contact your SWIFT account manager or visit www.swift.com/swiftref for more information.

About SWIFT

SWIFT is a global member owned cooperative and the world's leading provider of secure financial messaging services.

We provide our community with a platform for messaging and standards for communicating, and we offer products and services to facilitate access and integration, identification, analysis and regulatory compliance.

Our messaging platform, products and services connect more than 11,000 banking and securities organisations, market infrastructures and corporate customers in more than 200 countries and territories. While SWIFT does not hold funds or manage accounts on behalf of customers, we enable our global community of users to communicate securely, exchanging standardised financial messages in a reliable way, thereby supporting global and local financial flows, as well as trade and commerce all around the world.

As their trusted provider, we relentlessly pursue operational excellence; we support our community in addressing cyber threats; and we continually seek ways to lower costs, reduce risks and eliminate operational inefficiencies. Our products and services support our community's access and integration, business intelligence, reference data and financial crime compliance needs. SWIFT also brings the financial community together – at global, regional and local levels – to shape market practice, define standards and debate issues of mutual interest or concern.

Headquartered in Belgium, SWIFT's international governance and oversight reinforces the neutral, global character of its cooperative structure. SWIFT's international office network ensures an active presence in all the major global financial centres.
