

Your route to ISO 20022 and the CBPR+ guidelines

Your route to ISO 20022 and the CBPR+ guidelines is a 2-day seminar giving you an understanding of ISO 20022 and the main Standards MX messages in scope of the ISO 20022 adoption programme.

Become fluent with the terminology used by ISO 20022 experts. Discover the message flows, the MX equivalents of the legacy MT messages, and learn how MX messages are structured and populated. Understand and analyse the most important rules and guidelines formulated by the Cross-Border Payments and Reporting Plus (CBPR+) market practice group. Finally, learn how to locate and use essential SWIFT reference material and supporting tools such as MyStandards, that will help you once back on the job..

Each seminar is opened to a relatively small audience to promote interactivity, and knowledge retention. The two days are structured around seven key modules that together will give Payment Operations staff, Business Analysts and Product Owners the necessary foundational skills to manage the new ISO 20022 standards.

Each module includes a combination of theoretical presentations, group discussions, hands-on activities and review exercises that will help you crystallise your key learnings.

An immersive experience to boost your knowledge of the Cross-Border Payments and Reporting Plus guidelines in scope for ISO 20022 adoption programme.

Business background

With payment systems of all reserve currencies adopting ISO 20022, the financial community has decided to move to the new standard in Financial Institution to Financial Institution payments and reporting.

The **ISO 20022 Programme** will change the way you prepare, send and manage cross-border payments and reporting instructions.

Now is the time when you need to build the necessary expertise and capacity within your institution for this new language of payments.

SWIFT learning services are there to help you raise awareness and help you prepare for a smooth migration.

Learning objectives

The program covers following topics:

- Understand the structure, flow and usage of the main standards in scope of the ISO 20022 Programme
- Map the ISO 20022 standards with their equivalent MT standards
- Become familiar with the CBPR+ guidelines
- Learn to use the key reference tools
- Share experience with participants from other organisations

Audience

This course is designed for Payments Operations managers and staff, Payments Business Analysts and Product Owners, as well as IT personnel looking for an initial overview of ISO 20022 CBPR+ payments.
