

*Simplifies all standards-related information between you, your banks and your vendors*

### Benefits

- Understand and compare all your banks specifications
- Rationalise both your internal and external standards formats
- Create fit-for-purpose documentation for your vendors implementation projects
- Streamline your analysis of standards release impact

## MyStandards Premium Licence for Corporates

*The global standards management platform for global corporates*

Large corporations with subsidiaries and businesses across the world are typically involved with multiple banking partners in many different countries. Treasury management for such an organisation is often a very complex undertaking. To deal with this complexity, many options are available from regional treasury centres to global payment and collection factories.

Regardless of the option chosen by the corporate treasurer, such a project requires an in-depth understanding of the specificities of each banking partner. It often results in a multi-month process involving multiple iterations and stakeholders across the project team.

### Standards challenge for Corporates

As a corporate dealing with multiple financial institutions, you need first to understand the Message Implementation Guidelines (MIGs) of all the banks you want to work with. The guidelines describe how each bank uses the standard and are typically documented in different ways across a variety of incompatible documentation formats.

Moreover, each bank might have slightly different specifications for regulatory and business-specific reasons. Therefore, it is often difficult to aggregate this information and understand the impact of working with an additional bank.

Rationalising your usage of standards for treasury management across different subsidiaries also requires the same detailed analysis which often takes a lot of time and effort. Based on this analysis, you then need to drive your software vendor integration projects based on non-ambiguous and easily accessible specifications.

### The Solution: MyStandards Premium Licence for Corporates

MyStandards is an industry initiative gathering message specifications from major banks, market practice groups and corporates in a central, user-friendly web platform. It simplifies the communication, implementation and maintenance of all standards-related information between you, your banks and your vendors.

The free basic access to MyStandards provides small and medium corporates, working with a single banking partner, everything they need to understand their banks' specifications. However, the Premium licence allows you as a global corporate to rationalise your messaging formats across different subsidiaries, software vendors and banking partners using a state-of-the art platform.

Discover here the service that best meets your needs or simply register on [mystandards.swift.com](http://mystandards.swift.com) to find out more

	<b>MyStandards Basic</b> Small and medium-sized corporates	<b>MyStandards Premium</b> Large global corporates with subsidiaries and businesses across different regions with multiple banking partners around the world
Browse base standards and your banks guidelines	✓	✓
Download PDF, Excel and XML documentation from your bank	✓	✓
Compare a single bank guidelines together	✓	✓
Drive your vendor's implementation by offering multi-format documentation and self-service message validation against your specifications	✗	✓
Compare guidelines between different banks, easily assessing how your new banking partner differs from your current implementation	✗	✓
Offer an easy access to your content for your vendors using your dedicated homepage on MyStandards	✗	✓
Assess the impact of a new Standards Release on your guidelines with a single click	✗	✓

The Premium licence helps you manage all standards-related content across your organisation in the most efficient way, delivering the following benefits:

- Understand the differences between multiple banks' guidelines with just a couple of clicks
- Rationalise how you use standards across your subsidiaries
- Publish fit-for-purpose documentation for your software vendor to drive their implementation project
- Provide your vendor with self-service testing capabilities against these specifications, reducing implementation costs and risk of misunderstandings
- Maintain your guidelines over time by quickly assessing the impact of a change, such as working with an additional bank or migrating to a new version of standards

The Premium licence puts the right information at your fingertips and brings transparency to your standards-related projects. It also allows you to understand the difficulties sooner, plan in advance and reduce the implementation risks.
